EQUIPMENT upgraded

This device will be updated from time to time. If your device cannot be updated, the possible reasons are as follows:

① The current version is the latest version and no new upgrade package is available.

② Check whether the network connection of the device is normal. You can receive the upgrade notification only when the network connection is normal.

③ Do not perform any operation during the upgrade installation. Otherwise, the system installation may be interrupted or the upgrade may fail. The system cannot be used properly.

Pay attention to charging and battery usage

① Before charging, ensure that the charging port is clean and free of dirt.

② When connecting the charging cable to the charging port, ensure that the charging cable is correctly connected. Do not forcibly connect charging cables.

③This product does not come with a power adapter. If consumers use power adapter for power supply, they should purchase a power adapter that is certified and meets the requirements of the standard.

④ If the battery appears overheating, discoloration, deformation, swelling, leakage or other abnormal phenomena during use, charging or storage, it should be stopped in use to avoid safety problems.

⑤When charging, because the battery temperature will rise, do not put together with flammable materials, so as not to cause fire. Batteries must not be exposed to sunlight, fire, or similar conditions

It's overheating.

⑥ Do not remove, squeeze, heat, or burn the built-in battery, or use sharp objects, screwdrivers, or pry the battery. The above operations will cause the battery to fire.

⑦ In order to reduce the risk of electric shock for children, please charge this product under the guidance of parents or other guardians.

Safety precautions

Do not place the device in an environment where the temperature is too low or too high (lower than -10°C or higher than 50°C) for a long time. Extreme temperatures may affect the normal operation and service life of the equipment. Do not use this device in thunderstorm weather; Do not place the device in water;

Keep the device and all accessories away from children and pets to avoid choking or other serious consequences due to accidental ingestion.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instruction, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-Reorient or relocate the receiving antenna.

-Increase the separation between the equipment and receiver.

-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-Consult the dealer or an experienced radio/TV technician for help.

FCC Radiation Exposure Statement

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
