FOCUS ON MUSIC HEADSET

T08 user manual

User guide

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Package list

Wearing method

① Select and assemble the earbuds

For your perfect experience of the earphone please choose suitable earbuds and wear the earphone properly.
Ambient sound will be heard since the earbuds is half in-ear style.※X1characters are printed on the earbuds, the first 辉in displays the size and the second 辉indicates left & right.

② Wearing the earphone

Get the earbuds and earphones assembled together. Insert the correct earbuds into your ear canal(please note that left and right earbuds are different) , adjust the earbuds to a suitable angle until you have a tight and snug fit.

Earphone introduction

Charging dock using method

① Charging dock power on/off (for built-in battery version)

a. Charging dock power on/off - Single click power button to turn on the charging dock, the charging dock earphone charging indicators will continuously and slowly flash for several times(4 times = full battery; 3 times = 75% battery; 2 times = 50% battery; 1 time = 25% battery).

b. Long press power button for 1 second until left & right earphone charging indicators quickly flash 3 times and go off, the charging dock is now turned off.

c. The charging dock will turn off automatically after being idle for 8 hours (After taking the earphones out from charging dock or the earphones get fully charged)

d. Connecting or disconnecting with power source will not influence power on/off status of the charging dock(If you want to use charging dock to charge the earphone, you need to turn on the charging dock after it connected with power source)

② Charge the earphone with charging dock(for built-in battery version)

a. Earphone battery low - On Iphone or partial Android mobile phone, you can check earphone battery level on the phone, when earphone battery is at low level, there will be a 辉battery low 辉icon promoting every 2 minutes on your earphone, and at the meantime red light flashing instead of blue(both indicator flashing).

b. Plug the earphones into charging dock- Plug left & right earphones into the correct slots on charging dock(the pins on charging dock should touch the copper sheet on earphones).

Charging dock using method

c. Charge the earphone with charging dock - when the charging dock is in turned on status, plug both earphones into charging dock, earphones will be turned off automatically, now charging dock start to charge the earphones, left and right indicators flash every 1 second. After fully charge, the indicator will keeps on for 5 seconds and then goes off. Both earphone charging indicators will stop flashing after they get fully charged.

③ Charge the earphone and charging dock with charging cable(for built-in battery version)

Charge the charging dock - when charging dock gets connected with power source, red charging indicator of charging dock will keep on. The indicator will go off after it is fully charged.

④ There are built-in battery version and no battery version charging dock.

Difference between them : No battery version charging dock has no built-in battery and power button .blue indicator (only has blue light) near the charging port will keeps on when it is connected to power source, plug the earphones into charging slots to start charging the earphone.

⑤ The way of taking out or putting in the headset on charging box.

As shown in left picture, just let the strength perpendicular with charging box.

Charging dock using method

Turn on/off the earphone

① Press power button to turn on/off the earphone

The operation of turning on/off left and right earphone are the same

Turn on - long press power button until you hear "Power on" from the earphone, then loose your finger, blue indicator starting to flash.

Turn off - long press power switch for 4 seconds until you hear 辉power off辉from the earphone, then loose your finger, red light lasts for 1 second and then goes off.

② Use charging dock to turn on/off the earphone

The earphone will be turned on automatically when taking it out from a turned on charging dock(The earphone should be in charging mode for more than 5 seconds), then it will search and reconnect to the paired device.

Connecting method

① Right earphone enters pairing mode (pairing with cellphone)

Long press this button for 4 seconds, you will hear "Power on" from your earphone, do not loose your finger , keep pressing it until you hear "Pairing" then you can loose your finger now (red and blue light will flash alternatively)

② Right earphone pairing with cellphone

Activate Bluetooth on your cellphone and search for pairing name "T06-L" / "T08-L", click it and wait,there will be "connected" voice promoting from left earphone after successful connecting .

Connecting method

① Left and right earphone get reconnected automatically

Turn on your right earphone , long press left earphone power button for 1 second until you hear "power on ", then loose your finger,left earphone will automatically reconnected to the right earphone after successful reconnecting. (If you have leaving factory ,There will be "connected " voice promoting in left earphone after successful reconnecting, no voice prompting in right earphone.(if your right earphone already connected to cellphone, please please the music , it will increase the success rate of left and right earphone reconnecting)

② Left and right earphone re-pairing

When left and right earphone can not get reconnected automatically,you will need to pair left earphone with right earphone manually.Turn off your right earphone first ,long press left and right power button for 1 second until you hear "power on",then stick both buttons together and keep pressing them for 4 seconds until you hear "pairing",at the meantime red and blue light will flash alternatively and quickly. It looks like pink light flashing quickly , put both earphones close to each other and wait for them getting connected automatically , after successful connecting ,both pink lights will turn into blue lights and flash every 7 seconds.

Connecting method

① left earphone enters pairing mode (pairing with cellphone)

Long press power button for 1 second until you hear

"power on ",loose your finger ,then long press sub button for 4 seconds until you hear "pairing mode ", loose your finger , left earphone now enters into pairing mode of pairing with cellphone.(red and blue light flash quickly and alternatively)

② Left earphone pairing with cellphone

Activate Bluetooth on your cellphone and search for pairing name "T06-L" / "T08-L", click it and wait,there will be "connected" voice promoting from left earphone after successful connecting .

N※Characters Bluetooth name of both earphone , in normal situation ,no need to pair left earphone with your cellphone,the paired left earphone will automatically connect to cellphone.When right earphone is out of power or in the situation you need your left earphone connected with cellphone , you will need to pair left earphone with your cellphone.But when you use left earphone as main earphone and light earphone as sub earphone, answer calling/ reject calling /hang up /call volume up and down function of right earphone will be lost.

Specification

Model number	T06 Normal version / T08 Suppr version
Bluetooth version	Bleutooth 4.2
Support profiles	HFP/HSP/A2DP/AVRCP
Frequency response	20Hz-20kHz
Compatibility	iOS/Android/Windows
Straight line Bluetooth distance	≥10M
Water-proof level	IPX4
Speaker unit	φ8.2MM,22Ω
Earphone working time	4H
Earphone with charging dock working time	7.5H
Earphone charging time	1H45min
Charging dock charging time	1~2H
Earphone size	46*37*55mm
Earphone weight	35g

Usual question

1) which one on main headset or vice-headset is much faster power consumption when connecting with smart phone

TWS(real wireless)buds(Flewing picture one is Bluetooth headset connecting theory smart phone connect with main headset/vice-headset also connect with main headset/buds, the main headset is much faster power consumption than vice-headset. The catalog said time which main headset persistent time(The one is main-headset which connect with cellphone, Besides, Left-right side headset both can be main-headset).

Picture 1(TWS Bluetooth connection theory)

Picture 2

Usual question

2) when listening music by Bluetooth headset, usually pause, its because of lack of signal?

Its because of lacking signal between main headset and smart phone. Besides: lacking signal Between main headset and vice-headset. To clear the barrier and reduce the distance, which can enhance the signal. Following are main elements to effect the Bluetooth signal:

a. Like picture 2: somebody is at between main headset and vice-headset , which those position can effect the signal.(If the question is not be solved at present in TWS Headset Area), please avoiding this place when you using it.

b. The equipment self is lack of signal, iPhone cell Bluetooth signal is much power than others.

c. Due to Bluetooth and WIFI all use 2.4GHZ to connect, maybe there will be inter interference phenomen on when you use both of two at same time.

d. Moist or amost electric interferences(being fast people/air distancearo signal and not effect bull ding those also can effect the signal.

3 Production can not turn on ?

Please make sure the power is enough when you turn on it. If not, please charging and turn it some minutes later.

4) The cell phone can connect with Bluetooth headsetSare there any others way to connect?

Advice to clear the pairing list sheet when you use it at the first time , reopen theceiphone and turn on the Bluetooth function to match. And then , another thing should be checking which is pairing situation between headset and cell phone.Pulling the right side headset on and clicking the on/off, listening the voice of turning on but do not loosen your hands until when you hear the pairing voice situation. (putting the left side headset into the left ear and the right side headset into the right ear ,and start to pair left head set with cellphone, Just the left headset flashing, same by voice and Led indicator.)

Other way:headset connect with cellphone: putting on both of two which are right and left,pressing the right side and left headset on,wait,make sure that are in pairing situation voice and loosen your hands, and then please press left side on-off one second again until you listen the starting voice and loosen your hands(waiting left side to match right side, left side will connect to cellphone automatically). Then search the Bluetooth list to choose the T08 and clicking it to connect, it will remind pairing succeed when you pair succeed, its time to use it.

Usual question

5) The left-right side can not do connect automatic?

Do not play music when you just pair main headset, Please turn on the vice-headset and waiting both of them to connect, if for seconds.If not connect, Please try to click the on-off of main headset, this time maybe you will listen the voice of Du , Du? and this situation can start the vice-headset pairing function automatic. If the voice of Du? and Du can not be heard,please charging both of two headset for 1 hour, if these are in vain, you also can close the cellphone Bluetooth to make the main headset to be in pairing, Double clicking the right-left headset on-off at same time, and match right-left headset first and then turn on the cellphone Bluetooth, clicking the T06/T08 pairing name which you connect last time to wait pair automatic.

6) Play music/call phone , just one or both of them do have no sound?

Following might are reasons.

a. Android cellphone do not the same step with headset volume, please increase call and Bluetooth headset volume when you are listening music(the volume will be same step to the cellphone volume, but not the call volume).

b. Iphone cellphone do not the same step between calling and listening, maybe mute when you call phone but listening is loud sound, when both of two volume are high, you will listen the voice from both of two at same time, and just putting on the headset, the voice come from headset, all kinds of Android cell phone volume come from headset.

c. Please checking do or not connect call volume and Media volume in cellphone Bluetooth list, media volume connected succeed and Iman-list phone no headset, phone volume connected succeed but headset no sound, please connect the phone volume.

Remark:TWS Bluetooth headset and main headset connecting with cellphone also can connect with phone volume? so, when you use the main headset to call somebody or the ASR function, the vice-headset is mute.

7) Why the other side can not hear me when using the earphone to make a phone call ?

Reasons may be as following:

a. Choose a quiet place to make the phone call, keep the distance between earphone and cellphone within 3 meters and no barriers between them, make sure that there are no barriers between your mouth and the microphone, adjust call volume to maximum value.

b. If above adjustment does not work, please try the earphone on another cellphone, if the other side still can not hear you, it might be the problem of microphone damaged.

Usual question

8) How to deal with the problems of can not turn on/off the earphone,button failure,continuo us interruption , adjusting volume etc.

Please charge the earphone, try to operate it again after the earphone power is turned on.

9) Why can not charge the earphone or the earphone gets hot when charging ?

Please ensure the charging environment is good.(overcharging, charging dock has enough power to keep turning on status, please hard on earphone charging connecting point or change to another charging slot. Partial electric energy converts to heat energy when charging the earphone, Equipment, the battery get ting slight hot is normal phenomenon.

10) Android phone will be electric current voice and IPhone will be voice from out side when somebody are playing a game such as King of Glory and so on?

Due to some kinds of APP developed by third side company, so, it cannot be sure the compatibility. We have tested kinds of cellphone to play King of Glory, and all of them have those problems.

11) Left headset can be main headset to match with cellphone, and the right side headset can be vice-headset to match with left side headset?

Its OK. operational approach is based on double headset had been pairing successful, matching left side headset with cellphone first, and then turn on the right side headset, left-right side will be pairing automa tic. But , some function can not work when the left side be main headset such as cannot answer / hang up reject phone and ASR through right side headset.

12) Why the warning tone become English from Chinese?

we set Chinese-English shift function in our software operational approach: when the headset is not connection(including left-right headset not connection), pressing the on-off key and vice-key at same time much more than one second, you will hear the voice of辉Du, DU? and then to press the on/off to hear the voice which is QUANJI or Power off, by this way you can know if or not change the language succeed.

Clean and maintenance

1. Please do not disassemble or modify the earphones, it may cause the earphone malfunction or damage (not included in warranty).
2. Please keep the earphone away from caustic liquid, it may cause the earphone being seriously destroyed (not included in warranty).
3. Please do not put the earphone in thunderstorm, it will influence the normal work of earphone and incr ease the risk of being hit by lightning.
