3. INSTALLATION GUIDELINES

- Place your camera unit and monitor in a suitable location, see below recommendations:
  - Find a quiet room, and the image will be affected by environmental conditions.
  - Avoid strong wind blows. Place unit against a solid wall or ceiling, avoid mounting it on a window and avoid the interference the baby unit receives such as a door in the radio signal.
  - The signal strength may vary by other electronic devices and the environment. We suggest to place the unit at least 1 meter away from other electronic devices, such as TV, computers, wireless or mobile phones, fluorescent lights or other electronic appliances.
  - Use AC power, 2 AA Alkaline batteries, such as another camera for DAY-TO-NIGHT, Bluetooth headset, or other electronic devices, may cause interference with the product, unless the baby monitor uses a fixed 915 / 2.4ghz frequency and avoid interference, a more clear and stable image.
- Place the camera unit in the baby's room and the parent unit in the parent's room.

4. PLACEMENT OF THE BABY MONITOR

This product can be placed on the bedside or mounted on the wall. Use Velcro tape (sticker) or wall screws (not included) to fix the camera of a suitable location. Do not place the baby monitor near the heat sources such as radiators, stoves, cookers and direct sunlight. Keep the baby unit in view (min 1.5 m), avoid blocks and obstructions. If interference occurs, adjust the camera to elsewhere.

- Place the camera unit in a way to ensure it is not accessible to prevent accidents.
