HK-801

Installation instructions

1. Installation and Assembly of battery case: Open the battery case on the back of walkie-talkie, gently press in the case until it clicks, and close the battery case on the assembled position (as in Figure 1).
2. Battery installation: Use 3 AA size batteries as used in the transceiver for power supply. Battery between are required. Be between have the set to accomplish according to correct polarity and negative electrons, and series or matched power loss. If the transceiver not for long of use for time, take off power be set to take out the batteries to avoid power loss (see Figure 2).
3. Installation on Belt clip:

The belt clip of the transceiver has been installed and ready, only moving the fixing screw on the back, lift the belt clip, gently the clipper hooks at the top of the belt clip, and then push the belt clip to the same time, and then you can take out the belt clip. If you want to install the belt clip, align it tightly to the case, and apply a little force, and then it can be installed and fixed (Figure 3).

4. Installation of antenna:

Screw the antenna through the screw hole in the top of the belt clip, and then screw it on (see Figure 4).
