FCC Statement

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1)This device may not cause harmful interference.
(2)This device must accept any interference received, including interference that may cause undesired operation.
2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE:
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.
This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. if this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
Reorient or relocate the receiving antenna.
Increase the separation between the equipment and receiver.
Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
Consult the dealer or an experienced radio/TV technician for help.

Specific Absorption Rate (SAR) information
This device meets the government's requirements for FCC exposure limits set forth for an uncontrolled environment. This device was tested for typical body-worn operations with the back of the mobile phone kept 5 mm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain an 5 mm separation distance between the user's body and the back of the mobile phone. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.

Warnings

Please follow these simple guidelines to avoid some untoward incidents. Failure to do these may be dangerous or illegal.

- **Vibrate/ring switch**
  Long press the "#" key in the keyboard to quickly turn vibration mode or Silent mode on/off.

Care and Maintenance

Battery Care
- Your device is powered by a rechargeable battery. When the power is weak, please charge the battery. In order to extend the lifespan of the battery, consume first the power before recharging.
- When not in-use for longer time, take out the battery from the phone.
- Do not leave your phone charging for longer period other than specified. Overcharging may shorten its lifespan and may damage the battery.
- Extreme temperatures can affect the performance of the battery.
- Use the battery only for its intended purpose. Never use any charger or battery that is damaged.
- Do not short-circuit the battery. Accidental short-circuiting occurs when a metallic object such as coin, clip, or pen causes direct connection of the positive (+) and negative (-) terminals of the battery. (These look like metal strips on the battery.) Short-circuiting the terminals may damage the battery or the connecting object.
- Leaving the battery in hot or cold places, such as in a closed car in summer or a freezer in winter conditions, will reduce the capacity and lifetime of the battery. Always try to keep the battery between 59°F and 77°F (15°C and 25°C). A hot or cold battery may not function temporarily, even when the battery is fully charged.
- Battery performance is particularly limited in temperatures below freezing.
- Do not dispose of batteries in a fire! Dispose of batteries according to local regulations. Please recycle when possible. Cell phones are not considered household waste.

Mobile phone maintenance
- Keep the device dry. Precipitation, humidity, and all types of liquid intrusions or moisture may contain minerals that will corrode the electronic circuits. If your device is wet, remove the battery and allow the device to dry completely before using it.
- Do not use or store the device in dusty, dirty areas. Its moving parts and electronic components may be damaged.

- Do not store the device in cold areas. When the device returns to its normal temperature, moisture can form inside the device and damage its electronic circuits.
- Do not attempt to open the device other than as instructed in this guide. Only authorized technician can open and repair the device.
- Do not drop, knock or shake the device. Rough handling can break internal circuit and mechanism
- Do not use harsh chemicals, cleaning solvents, or strong detergents to clean the device.
- Do not paint the device. Paint can clog the moving parts and prevent proper operation.
- Use only the supplied or approved antenna. Unauthorized antenna, modifications, or attachments may damage the device and violates regulations governing radio devices.
- We advise you to follow above instructions and precautionary measures. Please take your phone to the nearest authorized service center when it does not operate normally.

Caution: The manufacturer assumes no responsibility for the consequences as a result of the users non compliance of the above instructions, Phone misuse voids its warranty.

Accessories

Please use accessories in the package or those which are authorized by the Company. Else. using non-authorized accessories voids the warranty of unit.
