

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the internal components of an Electronic Unit (EUT) housed in a black plastic casing. The green printed circuit board (PCB) is visible, featuring a large, circular, multi-layered component (likely a coil or antenna) in the center. The PCB is populated with various electronic components, including resistors, capacitors, and integrated circuits. A black battery is visible at the bottom of the board. The assembly is placed on a blue textured surface next to a black ruler with white markings, indicating dimensions in millimeters.
Solder Board-Component View 1	 A photograph showing a close-up view of the green printed circuit board (PCB) with various electronic components soldered onto it. The components include a large, rectangular, silver-colored component (likely a battery or a large capacitor) and several smaller components, including resistors and integrated circuits. The PCB is placed on a blue textured surface next to a black ruler with white markings, indicating dimensions in millimeters.

Solder Board-Component View 2	 A photograph of a green printed circuit board (PCB) with various electronic components, including a red capacitor and several integrated circuits. The board is positioned on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the board's width spanning approximately 100 mm.
Solder Board-Component View 3	 A photograph of the same green PCB from a different angle, showing the underside or a different side. It features a large circular cutout in the center and various components like a black capacitor and integrated circuits. The board is placed on a blue textured surface next to a black ruler with white markings, indicating a width of about 100 mm.
