# Watch charging and activation

Make sure that the bracelet has normal power during initial use. If the bracelet cannot be started normally with low power, please connect the charger to charge the device.

#### Main features

Sleep mode
When falling asleep, the bracelet will automatically enter the
sleep monitoring mode, Automatically detect your times of
deep sleep? light sleep? waskefulness throughout the night
and calculate your sleep quality. The bracelet enyl displays the
total duration of deep sleep? (light sleep) sleep, and the app car
went the details of sleep data.

Heart rate

Enter the heart rate three in one test interface and wait
for several seconds to display the test results of current
heart rate, blood pressure and blood oxygen. This func
-tion requires the bracelet to support the heart rate and
blood pressure sensors.

Exercise

8 Sports modes to choose from including: walking, running, cycling, basketball, football, badminton, jumping rope and swimming. More detailed analysis and data Records can be viewed in the cleint. Pedometer is cleared in the early hours of the morning.

Weather information
The weather page displays the current weather, air
quality information, and tomorrow's conditions for
tomorrow. The weather information is only available
if you are connected to the client. If you are disconne
for a long time, the weather information will not be
updated.

Camera controls
When connected, start photographing from the bracelet
end or enter the remote photographing interface from
the app end, shake / roll your wrist / touch the bracelet,
and take photos automatically after the countdown of
3 seconds. Please allow the app to access the album to
save self taken photos.

Sedentary reminder
Set whether the sedentary reminder function is enabled
You can set the reminder time interval. If you sit for a
long time within the set time, the bracelet will remind
you.

Do not disturb mode
Turn on the do not disturb mode function, you can set
the do not disturb time period, and the bracelet will stop
receiving notification messages within the set time
period to avoid being disturbed by reminder messages.

Why do blood pressure values deviate from the blood pressure monitor? The deviation between the watch and the sphrypmonamenter in due to a number of actors. The sphrypmonamenter measures in the farchal art ray and the watch for actors. The sphrypmonamenter measures in the farchal art ray and the watch between the sphrypmonamenter and the sphrypmonamenter of the sphrypmonamenter and the sphrypmonamenter of the sphrypmonamenter and the sphrypmonamenter of the

# **FCC Statement**

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

### **RF Exposure Information**

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.

# **ISED Statement**

- English: This device complies with Industry Canada license-exempt RSS standard(s). Operation is subject to the following two conditions: (1) This device may not cause interference, a nd (2) This device must accept any interference, including interference that may cause undesired operation of the device.

The digital apparatus complies with Canadian CAN ICES-3 (B)/NMB-3(B).

- French: Le présentappareilestconforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence.
