13th July 1999

Dear Sirs,

SB300 and SB320 Wireless Data Modems

This letter is to confirm that the radio circuit used in these two models of our modems is identical.

The modems are assembled using two circuit boards: one containing the radio circuits; the other containing the user interface and control circuits. This assembly format allows us to use the same radio in the two products. Attached to this letter are the modem assembly parts lists for the two products which show the same radio board used in both.

Yours faithfully,

Keith Campden
Manager, Product Support Engineering
