

M-RM63 : Product Description

Purpose:	M-RM63 is a wireless mouse, identical to current mice, with the added convenience of being free of cable. The system uses the 27 MHz ISM band. The transmitter implement a low power mode for batteries saving.
System:	This wireless mouse (M-RM63) works with the C-BA4-MSE or all compatible receiver.
Radio transmission:	Mono directional, from mouse to computer only.
Number of channels:	1
Carrier frequencies:	27.045 MHz.
Modulation:	FSK
Data Rate:	2400 bit/s.
Transmission range:	2m typical, free space.
Power Consumption:	100 mW typical when in movement.
Effective radiated power:	200nW typical.
Antenna:	Inductive loop of 25 cm ² , integrated on printed circuit board.
