Vehicle /Connection LED	Green	<ul style="list-style-type: none">• Solid Green: The VCI is connected via USB cable.• Flashing Green: The VCI is communicating via USB cable.
	Blue	<ul style="list-style-type: none">• Solid Blue: The VCI is connected via Bluetooth.• Flashing Blue: The VCI is communicating via Bluetooth.

IMPORTANT: Before operating or maintaining this unit, please read these instructions carefully, paying extra attention to the safety warnings and precautions. Failure to use this product properly may cause damage and/or personal injury and will void the product warranty.

1

- Insert the Vehicle Data Connector on the MaxiVCI V200 into the vehicle's DLC, which is generally located under the vehicle dashboard.

2

- Ensure the tablet is sufficiently charged or is connected to the supplied DC power supply.
- Power up the tablet.

3

- Pair the tablet with the MaxiVCI V200 via Bluetooth to establish a communication link.

☑ **NOTE:** The tablet and the MaxiVCI V200 are configured to automatically synchronize with each other on first use, so there should be no need to pair up.

OR

Alternatively, connect the tablet and the MaxiVCI V200 using the USB cable.

4

- When the MaxiVCI V200 is properly connected to the vehicle and the tablet, the VCI status button on the bottom bar of the screen will display a green badge with a check mark at the corner indicating the tablet is ready to start vehicle diagnosis.

FCC STATEMENT :

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

Warning: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Reorient or relocate the receiving antenna.

Increase the separation between the equipment and receiver.

Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help.

RF warning statement:

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
