A photograph of a black, rectangular, perforated metal enclosure, likely a speaker or amplifier, resting on a surface next to a ruler for scale. The ruler shows measurements in inches and centimeters. The enclosure has a perforated front panel and a solid top and side panels. It is positioned horizontally, and the ruler is placed below it to provide a sense of scale. The background is a plain, light-colored surface.

A custom-built, foldable electronic device, possibly a portable network switch or router. The device has a black front panel with a white, V-shaped top and bottom. The front panel features a USB 3.0 port, a power jack, a reset button, a control switch, a 10/100/1000 Mbps Ethernet port, and two 2.5 Gbps LAN ports. A ruler is placed below the device for scale.
