

Headset Mode

Headset Mode is designed for use with a headset. It provides a more immersive experience by using the headset's microphone and speakers.

When using Headset Mode, the game will automatically adjust the audio settings to match the headset's capabilities. This includes adjusting the volume, balance, and spatial audio settings.

Switching Modes

To switch between Standard Mode and Headset Mode, go to the **Audio** settings menu and select the desired mode. The game will automatically adjust the audio settings to match the selected mode.

Headset Mode

When using Headset Mode, the game will automatically adjust the audio settings to match the headset's capabilities. This includes adjusting the volume, balance, and spatial audio settings.

Cards

Cards are a key feature of the game, allowing players to collect and use them in various ways. They are divided into two main categories: **Common Cards** and **Rare Cards**.

Common Cards are the most basic and easiest to obtain. They typically provide a small bonus or a minor effect. **Rare Cards** are more difficult to obtain and provide a significant bonus or a major effect.

Players can collect cards by completing quests, defeating enemies, or finding them in the game world. Once collected, cards can be used in a variety of ways, including equipping them to a character, using them as a weapon, or selling them for in-game currency.

Card Types

- Common Cards:** These cards provide a small bonus or a minor effect. They are the most basic and easiest to obtain.
- Rare Cards:** These cards provide a significant bonus or a major effect. They are more difficult to obtain and are highly valued by players.

Optical Flow Positioning

Optical Flow Positioning is a feature that allows players to track their movement in the game world. It uses a camera to capture the player's position and movement, and then uses optical flow to track their movement.

When using Optical Flow Positioning, the game will automatically adjust the camera's position and movement to match the player's position and movement. This allows players to track their movement in the game world and use it to their advantage.

How to Use Optical Flow Positioning

1. Enable Optical Flow Positioning in the game settings.
2. Move in the game world.
3. The camera will automatically track your movement.
4. Use the camera's position and movement to your advantage.

Apply Operation Guide

The Apply Operation Guide is a feature that allows players to apply the game's rules and regulations to their own game. It provides a step-by-step guide to the game's rules and regulations, and allows players to apply them to their own game.

When using the Apply Operation Guide, players can select the rules and regulations they want to apply to their game. The game will then automatically apply these rules and regulations to the game.

How to Use the Apply Operation Guide

1. Select the rules and regulations you want to apply to your game.
2. The game will automatically apply these rules and regulations to the game.

How to Use the 3D Map

The 3D Map is a feature that allows players to view the game world in a 3D perspective. It provides a more immersive experience by showing the game world in a 3D perspective.

When using the 3D Map, players can view the game world in a 3D perspective. This allows players to see the game world from a different perspective and use it to their advantage.

How to Use the 3D Map

1. Enable the 3D Map in the game settings.
2. View the game world in a 3D perspective.

How to Use the 3D Map

The 3D Map is a feature that allows players to view the game world in a 3D perspective. It provides a more immersive experience by showing the game world in a 3D perspective.

When using the 3D Map, players can view the game world in a 3D perspective. This allows players to see the game world from a different perspective and use it to their advantage.

How to Use the 3D Map

1. Enable the 3D Map in the game settings.
2. View the game world in a 3D perspective.

How to Use the 3D Map

The 3D Map is a feature that allows players to view the game world in a 3D perspective. It provides a more immersive experience by showing the game world in a 3D perspective.

When using the 3D Map, players can view the game world in a 3D perspective. This allows players to see the game world from a different perspective and use it to their advantage.

How to Use the 3D Map

1. Enable the 3D Map in the game settings.
2. View the game world in a 3D perspective.

How to Use the 3D Map

The 3D Map is a feature that allows players to view the game world in a 3D perspective. It provides a more immersive experience by showing the game world in a 3D perspective.

When using the 3D Map, players can view the game world in a 3D perspective. This allows players to see the game world from a different perspective and use it to their advantage.

How to Use the 3D Map

1. Enable the 3D Map in the game settings.
2. View the game world in a 3D perspective.

How to Use the 3D Map

The 3D Map is a feature that allows players to view the game world in a 3D perspective. It provides a more immersive experience by showing the game world in a 3D perspective.

When using the 3D Map, players can view the game world in a 3D perspective. This allows players to see the game world from a different perspective and use it to their advantage.

How to Use the 3D Map

1. Enable the 3D Map in the game settings.
