October 3rd, 2018

To whom it may concern:

AT&T confirms that the Netgear M5f UE (User Equipment) will operate on its 5G network with a configuration of 3:1 DL: UL ratio, i.e., the highest Uplink duty cycle is 25% for the lifetime of this device.

Sincerely,

A handwritten signature in blue ink, appearing to read "Gordon", followed by a long, horizontal, wavy line.
