A photograph of a green printed circuit board (PCB) with various electronic components. The board is oriented vertically and placed on a blue surface next to a ruler for scale. Key components include a large black integrated circuit (IC) labeled 'ANTKA' with 'M2701E12A' and 'DL070214' markings. Other components include a red component, several capacitors (including a large electrolytic capacitor labeled '1000µF'), and various smaller surface-mount components. The board has multiple connectors, including a large multi-pin connector at the top and a smaller one at the bottom. The ruler shows measurements in centimeters, with markings from 0 to 100 visible.
