

WARRANTY

Midland will repair or replace, at its option without charge, any Midland FRS/GMRS product that is found to have a defect in material or workmanship within One Year following the initial purchase date. This warranty does not apply to water damage, battery leak damage or abuse.

This warranty does not include any carrying cases, earphones, or antennas, which may be a part of or accessory to the product, or the cost of labor for removal or re-installation of the product in a vehicle.

For service under this warranty may be obtained by returning the warranted product, with proof of purchase date, to:

Midland Corporation
Customer Service Department

PO Box 1000
St. Louis, Missouri 64116.

Warranty is limited by specific legal rights, and you may also have other rights, which vary, from state to state.

This warranty applies only to merchandise purchased in the United States of America or any of its possessions, and not to merchandise purchased elsewhere, or from a U.S. Military exchange.

Introduction

Your M-222P represents the state-of-the art in high-tech engineering for General Mobile Radio Service operation, this compact package offers excellent performance. It is a quality piece of electronic equipment, skillfully constructed with the finest components. The circuitry is all solid-state and mounted on rugged printed circuit boards. Your M-222P is designed for many years of reliable, trouble-free performance.

FCC Licensing Information

Your M-222P operates on General Mobile Radio Service (GMRS) frequencies and is subject to the Rules and Regulations of the Federal Communications Commission (FCC). The FCC requires that all operators using General Mobile Radio Service (GMRS) frequencies obtain a radio license before operating the equipment for business, personal or recreational use. A GMRS license for an individual may be shared by immediate family members. To obtain application forms, call the FCC forms hotline at 1-800-418-3676 or visit <http://www.fcc.gov>. Please request forms **605** and **159** which include the necessary forms and instructions.

For questions concerning licensing, please contact the FCC at 1-800-418-3676 (1-888-225-5322), or go to <http://www.fcc.gov>.

CALL

Call indicator

To avoid accidentally changing radio operation, press  for 3 seconds. A lock icon will appear. When the lock icon is on the menu functions buttons are disabled. When locked, you will be able to turn the radio on, increase or decrease volume, monitor, transmit and send a call tone, press  for 3 seconds.

The M-222P has 10 different call tones available. To select the call

tone, repeatedly press  until **CALL** appears. The current call tone setting will begin to flash.

Press  or  to change the call tone. The new call tone will be heard from the speaker.

Press  or the PTT button to save the new call tone and exit the

call tone menu. Setting the call tone to 0 disables the call tone function.

Roger Beep: Whenever you release the PTT button, a “Roger Beep” tone is sounded to let your friends know you are finished talking. To enable the Roger Beep, turn the radio off. Press and hold  as you turn your radio on. The lock icon will appear in the upper right position of the display. Repeat the process to turn off the Roger Beep.

Operation

Power On/Off: Turn the knob on the top of the radio clockwise to turn the radio on. Turn the knob counterclockwise to turn the radio off.

Volume: Rotate the knob clockwise to increase the volume and counterclockwise to decrease the volume.

Talking and Listening: To communicate, all radios in your group must be on the same channel and CTCSS code.

- For maximum clarity, hold radio 2 to 3 inches from mouth.
- Press and hold PTT button and speak in a normal voice into the microphone. The LED indicator light glows continuously while transmitting.
- To receive messages, release the PTT button.

Disabling Button Beeps: A feedback beep is normally sounded when a front panel button on the radio is pressed. To turn this feature on or off, turn the radio off and hold the  button 3 seconds while turning the radio on. The lock icon will be on when beeps are enabled.

Compliance with Part 15 of the FCC rules. Operation is subject to the condition that this device does not cause harmful interference.

In compliance with the FCC's RF exposure guidelines, this device must maintain a separation distance of at least 15 cm (6 inches) from your body. To transmit, hold the radio with the antenna pointed up and away from your face, with the radio at least two inches (5 cm) from your face. Speak in a normal voice into the microphone.

Technical Specifications

General

Frequency Range	462.5625 - 462.5675 MHz
Channels	1
CTCSS Codes	100.0 Hz
Antenna Impedance	50 Ohms
Speaker Impedance	8 Ohms
Power Supply	3 AA
Modulation Type	FM
Intermediate frequencies	1 st IF = 21.7 MHz

Receiver

Sensitivity (for 12 dB Sinad)	0.5 uV
Audio out put power (@ 10%THD)	100 mW
Audio distortion (@ 500 mVrms)	0.5%
Signal/Noise ratio	12 dB
Image Rejection	60 dB
Adjacent channel selectivity	60 dB
Current drain (standby)	10 mA

Transmitter

Modulation	FM 1.5 kHz
Signal/Noise ratio	12 dB
Current drain (max)	100 mA

Buttons & Indicators

External Speaker/Microphone Jack: Your M-222P can be used with optional external speaker/microphone or headset, freeing your hands for other tasks. To use an optional speaker/microphone or headset:

- Open the SPK/MIC cover on right side of the radio.
- Insert the plug(s) into the SPK/MIC jacks.

Intercom: Your M-222P can be used with optional accessories to operate as an intercom system.

- Open the INT cover on top of the radio.
- Insert the appropriate plug into the INT jack.

Belt clip: Your M-222P comes with a belt clip. To install the belt clip:

- Slide the clip down into the slots on the back of the radio until the latching mechanism clicks.

To remove the belt clip:

- Pull outward on the latching tab while gently sliding the clip off the top of the radio.

Batteries

The radio operates with 3 AA Alkaline batteries. The belt clip should be removed before battery installation or removal. To install or remove batteries:

1. With the radio facing you, gently press the triangular battery latch on the top of the radio.

2. Slide the bottom edge of the battery cover and lift the cover off.

3. Insert the batteries observing the polarity as shown.

4. Push the two alignment tabs on the top edge of the cover into their slots on the bottom of the cover to secure.

5. Batteries are not included.

VOX: VOX (voice operated transmit) operation allows you to transmit using the PTT button when using a headset. To enable VOX operation:

- Open the SPK/MIC cover on right side of the radio.
- Insert the headset plug(s) into the SPK/MIC jacks.
- Set the VOX switch on headset to VOX position.
- Turn on the radio. The **VOX** icon will appear.

Note: The VOX level must be set properly for correct VOX operation.

VOX Level setup: Your M-222P has three selectable VOX levels. The level should be adjusted so that your voice causes the radio to transmit and environmental noise does not. To set the VOX level:

- With the radio on, repeatedly press the **VOX** button until **VOX** appears on the display. The VOX setting will begin to flash.
- Press the **DOWN** or **UP** arrow button to change the VOX level.
- Press the **MENU** or the PTT button to save the new call tone and return to the menu.

Note: Selecting level 0 will disable VOX operation without regard to the VOX switch setting on the headset.

Channel Selection: Your M-222P has 22 channels available. To change the channel, repeatedly press  until the current channel number flashes. Press  or  buttons to change the channel. Press  or the PTT button to save the new channel and exit the channel selection mode.

CTCSS Selection: Your M-222P has 38 CTCSS codes available. The selected CTCSS code will be different for each channel. To select a CTCSS code for the current channel, repeatedly press  until the current CTCSS code number flashes.

Press  or  buttons to change the CTCSS code number. Press  or the PTT button to save the new CTCSS code and exit the CTCSS selection mode.

Setting a CTCSS code of 0 will disable the CTCSS feature. To communicate between two M-222P radios, both the channel and CTCSS code selections must be the same.

To communicate with other channels and brands of radios the actual radio frequency and CTCSS frequency must be matched. The frequency charts at the back of this book are included for this selection. In general, the first fourteen channel selections may be used to communicate with most FRS radios.

Monitor button: Pressing and holding the  button lets you hear the current channel so you can adjust the volume level of the radio level when not receiving. The  should be used to check activity on current channel before transmitting.

Time out Timer: The Time-out Timer feature helps extend battery life by preventing accidental continuous transmission. The radio will emit a beep tone if the PTT button is pressed continuously for 60 seconds and then stop transmitting.

Power Selection: Your M-222P has two transmit power levels. To select a power level on channels 1-7 and 15-22:

- Press  until the **P.HIGH** or **P.LOW** icon flashes.
- Press  or  for select between high and low power level.
- Press the PTT button for save and exit.

Note: On channels 8-14 no power level selection is possible.
