

**NOTE:** Fan blades come packed separately from the main power unit assembly, as required.

**NOTE:** Fan blades come packed separately from the main power unit assembly, as required.

Insert most blades into the left side.  
It slides in, no clunk or rattle.  
The blade can only be inserted  
one way.

Turn the power OFF using the wall light switch for that outlet before inserting the unit.

If the blades come in contact with an object during operation, the fan will stop.  
To restart:

**Option B:**

Wait for 4–5 seconds, then switch it back on. Last used light setting is restored, then using the remote control.

**Option C:** Just wait 4–5 secnds before using the remote control again.

We derive earnings with part 15 of the FDC Index. Creditors is subject to the following two conditions: (1) it is strictly based on the level of sales, and (2) the index is not used in a performance context, including compensation that may create an upward pressure on pay. Changes or modifications to this will not be subject to the party responsible for compliance could lead the user's ability to apply as he or she sees fit.

NOTE: This equipment has been tested and found to comply with the following limits: Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If it is found that this equipment does cause interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and the receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE: This device and its antenna(s) must not be co-located or operation in conjunction with any other antenna or transmitter

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
