Dear Sir or Madam:

The chip 300A5984 installed in our product Wireless DoorBell (model name: Bell 22S, Bell 22T, Bell 22Q, FCC ID: 2AG7C-BELL22T), which support 433.92MHz and 915 MHz. But, for the product, it only activates 433.92MHz, the 915 MHz disabled by using the software.

Please contact me if there is need for any additional clarification or information.

Best Regards,

Sincerely Yours,

Signature:
