Attn: Director of Certification

1. The Skyway 7000 device will be sold through trained resellers. It is not available to the general public and cannot be purchased through mail order.
2. Each transmitter, enclosure and antenna configuration is specifically packaged for the customer. The installation (user) manual is not intended to address all configurations possible. Fixed point to point applications are addressed by this customer specific distribution system. Antennas are supplied identified as Solectek part numbers only.
3. Solectek has training program for our resellers.
4. Installation requires a site survey using sophisticated signal analysis tools.
5. The Skyway 7000 is used for carrier and enterprise class wireless networks. The use will be used in commercial locations only, therefore FCC Class A specifications apply.
