

Class 2 Permissive Change LE910-NA1

Object: Declaration for additional models covered under existing FCC ID.

Pursuant to CFR47 part 2.1043(b)(1) and §2.924, we hereby declare that the LE910-NA1 model is marketed under the existing FCC ID as reported below, according to the FCC permissive change policy:

For FCC ID: RI7LE910NAV2: Add model LE910-NA1

The changes made to the currently certified model are firmware related and do not degrade the characteristics currently reported and accepted by FCC.

No changes to transmit power output, modulation or frequency have been made.

Therefore, LE910-NA1 model can be considered to be electrically identical to the corresponding already assessed radio module LE910-NA V2.

New user manuals for these models have been developed to describe the firmware commands, following the general format of the certified models with the exact same FCC information.

Sincerely,

Trieste, 2016-04-06
