

IrriGreen FCC Antenna Info

March 6, 2014

IrriGreen Server Model 500101

The IrriGreen Server includes a printed circuit board antenna similar to an inverted F type. The SMC connector on the back side of the printed circuit board is for test purposes and is not connected to the antenna feed as produced. The IrriGreen Server is installed by professional irrigation installers and the circuit board antenna is encased in as shown in the photo exhibits. The antenna gain is approximately 1 dBm based on test measurements.
