RE: Askey Computer Corp.

FCC ID: H8NWLC3012

I have a few comments on this Application.

- 1.) This device is a PCMCIA form factor transmitter with external antennas for use in RF category "Mobile" conditions. However, the Manual seems to indicate its usage is for laptop and desktop computers. Please revise Manual to reflect actual usage conditions as specified in the Modular Request letter.
- 2.) End product labeling on page 43 of Manual does not match the Modular Request letter.
- 3.) Manual specifications seem to indicate this device can be tuned to frequencies not permitted within the United States. Please indicate how this transmitter is limited to 802.11b/g channels 1 through 11 (2412 - 2462MHz).
- 4.) Please indicate where I can find the required in 15.21 "Information to User" statements.
- 5.) Block Diagram does not list frequency of crystal as required in the Rules.
- 6.) Operational description does not match installation conditions requested in Modular Approval letter.
