RE: Nokia Corporation

FCC ID: PYANHL-4

After a review of the submitted information, I have a few comments on the above referenced Application.

- 1) The new photographs provided for the top and bottom of the main PCB board are too dark and unclear. Please provide better photographs.
- 2) Internal and External photograph exhibits appear to be provided for only 1 model. Please provide additional photographs as necessary for the 2<sup>nd</sup> model (i.e. any differences that may be determined through the photographs).
- 3) The probe calibration factors show the diode compression voltage. Please state the maximum diode voltages measured during the SAR test.

Timothy R. Johnson  
Examining Engineer

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
