

FCC §15.247 (i), §2.1091 - RF Exposure

# FCC ID: 2AZ6H-ICB88

## Applied procedures / limit

According to FCC §15.247(i) and §1.1307(b)(1), systems operating under the provisions of this section shall be operated in a manner that ensures that the public is not exposed to radio frequency energy level in excess of the Commission's guidelines.

**Limits for Occupational / Controlled Exposure** 

| Frequency<br>Range (MHz) | Electric Field<br>Strength (E)<br>(V/m) | Magnetic Field<br>Strength (H)<br>(A/m) | Power Density (S)<br>(mW/ cm²) | Averaging Time<br> E  <sup>2</sup> , H  <sup>2</sup> or S<br>(minutes) |  |
|--------------------------|---|---|--------------------------------|--|--|
| 0.3-3.0                  | 614                                     | 1.63                                    | (100)*                         | 6  |  |
| 3.0-30                   | 1842 / f                                | 4.89 / f                                | (900 / f)*                     | 6  |  |
| 30-300                   | 61.4                                    | 0.163                                   | 1.0                            | 6  |  |
| 300-1500                 |   |   | F/300                          | 6  |  |
| 1500-100,000             |   |   | 5                              | 6  |  |

Note: *f* is frequency in MHz

# **Limits for General Population / Uncontrolled Exposure**

| Frequency<br>Range (MHz) | Electric Field<br>Strength (E)<br>(V/m) | Magnetic Field<br>Strength (H)<br>(A/m) | Power Density (S)<br>(mW/ cm <sup>2</sup> ) | Averaging Time  E  <sup>2</sup> , H  <sup>2</sup> or S (minutes) |
|--------------------------|---|---|---|--|
| 0.3-1.34                 | 614                                     | 1.63                                    | (100)*                                      | 30   |
| 1.34-30                  | 824/f                                   | 2.19/f                                  | (180/f)*                                    | 30   |
| 30-300                   | 27.5                                    | 0.073                                   | 0.2   | 30   |
| 300-1500                 |   |   | F/1500                                      | 30   |
| 1500-100,000             |   |   | 1.0   | 30   |

Note: f = frequency in MHz

<sup>\* =</sup> Power density limit is applicable at frequencies greater than 100 MHz

<sup>\* =</sup> Plane-wave equivalent power density

## MPE PREDICTION

Predication of MPE limit at a given distance, Equation from OET Bulletin 65, Edition 97-01

$$S = PG/4\pi R^2$$

Where: S = power density

P = power input to antenna

G = power gain of the antenna in the direction of interest relative to an isotropic radiator

R = distance to the center of radiation of the antenna, R=0.2m

### **TEST RESULTS**

| Mode      | Tune up Produce power | Maximum peak output power (dBm) | Output power<br>to antenna<br>(mW) | Antenna Gain (numeric) | Power Density (S) (mW/ cm2) | Limit<br>(mW/ cm2) | Result |
|-----------|-----------------------|---------------------------------|------------------------------------|------------------------|-----------------------------|--------------------|--------|
| 2.4G WIFI | 13±1                  | 14                              | 25.119                             | 1.77<br>(2.48dBi)      | 0.008845                    | 1                  | Pass   |
| 5.1G WIFI | 10±1                  | 11                              | 12.589                             | 3.14<br>(4.97dBi)      | 0.007864                    | 1                  | Pass   |
| 5.8G WIFI | 8±1                   | 9                               | 7.943                              | 2.49<br>(3.96dBi)      | 0.003935                    | 1                  | Pass   |
| BLE       | 3±1                   | 4                               | 2.512                              | 1.77<br>(2.48dBi)      | 0.000885                    | 1                  | Pass   |

The BLE, 2.4G WIFI, 5.1G WIFI, 5.8G WIFI can transmit at the same time. So the worst simultaneous transmitting consideration:

The ratio= $0.008845/1+0.007864/1+0.003935/1+0.000885/1=0.021529 \le 1.0$ 

#### Conclusion:

For the all Power Density≤ 1.0, compliance with FCC's RF Exposure
