**Form 731 Confirmation No.: EA96450**  
**Correspondence Reference No.: 12884**  
**Request for Additional Info.: 3/20/00**

Dear Errol / Kwok:

Submitted herewith, on behalf of Denso International America, Inc. is an amendment in response to your e-mail dated March 20, 2000 requesting additional information for the subject application.

1. Attached is the re-uploaded SAR test report, head SAR test plots, and head SAR test setup photos that were apparently not received. Please note that all requested exhibits were previously uploaded on January 21, 2000 with confirmation and no error.
2. Body-worn SAR was tested with belt-clip and without belt-clip which was discussed during our meeting with Denso on the first week of January due to the metallic component on the belt-clip (please see uploaded SAR test report). Also attached are the resubmitted body SAR test plots and test setup photos with belt-clip (Note: Test plots and setup photos without belt-clip were apparently received).
3. Also attached is the revised users manual body-worn statement to comply with the new RF exposure requirements.

We trust this information is sufficient to continue the SAR review and issue the grant asap. Should you have any questions or comments concerning the above, please contact the undersigned.
