

Wireless Dongle

Lenovo (Beijing) Limited

201-H2-6, Floor 2, Building 2, No. 6 Shangdi West Road, Haidian District, Beijing, China

Test Date		MSBART																																															
Trace Name		09-D00950-C																																															
App No		PCB																																															
Model Name		Free Space & Tailing Position																																															
Test Date		PCB																																															
Frequency		Frequency																																															
TCID Note		Frequency																																															
Avg Port Used (Hz)		Frequency																																															
Avg Port Used (Hz)		Frequency																																															
Avg Port Used (Hz)		Frequency																																															
Avg Port Used (Hz)		Frequency																																															
Avg Port Used (Hz)		Frequency																																															
Avg Port Used (Hz)		Frequency																																															
Avg Port Used (Hz)		Frequency																																															
Avg Port Used (Hz)		Frequency																																															
Avg Port Used (Hz)		Frequency																																															
Avg Port Used (Hz)		Frequency																																															
Avg Port Used (Hz)		Frequency																																															
Avg Port Used (Hz)		Frequency																																															
Avg Port Used (Hz)		Frequency																																															
Avg Port Used (Hz)		Frequency																																															
Avg Port Used (Hz)		Frequency																																															
Avg Port Used (Hz)		Frequency																																															
Avg Port Used (Hz)		Frequency																																															
Avg Port Used (Hz)		Frequency																																															
Avg Port Used (Hz)		Frequency																																															
Avg Port Used (Hz)		Frequency																																															
Avg Port Used (Hz)		Frequency																																															
Avg Port Used (Hz)		Frequency																																															
Avg Port Used (Hz)		Frequency																																															
Avg Port Used (Hz)		Frequency																																															
Avg Port Used (Hz)		Frequency																																															
Avg Port Used (Hz)		Frequency																																															
Avg Port Used (Hz)		Frequency																																															
Avg Port Used (Hz)		Frequency																																															
Avg Port Used (Hz)		Frequency																																															
Avg Port Used (Hz)		Frequency																																															
Avg Port Used (Hz)		Frequency																																															
Avg Port Used (Hz)		Frequency																																															
Avg Port Used (Hz)		Frequency																																															
Avg Port Used (Hz)		Frequency																																															
Avg Port Used (Hz)		Frequency																																															
Avg Port Used (Hz)		Frequency																																															
Avg Port Used (Hz)		Frequency																																															
Avg Port Used (Hz)		Frequency																																															
Avg Port Used (Hz)		Frequency																																															
Avg Port Used (Hz)		Frequency																																															
Avg Port Used (Hz)		Frequency																																															
Avg Port Used (Hz)		Frequency																																															
Avg Port Used (Hz)		Frequency
