

Antenna professional install

In accordance with KDB 353028 D01 Antennas Part 15 Transmitters v01r01 section II, A (c):

iii) The applicant should address the following items when justifying professional installation.

- 1) The Camera Hub is part of the range of Senceive nodes and gateways that are specialist pieces of civil engineering equipment sold on a business to business basis for monitoring the movement of bridges, tunnels, railway embankments and similar large structures.
- 2) The Camera Hub is only available to buy from Senceive or selected specialist resellers
- 3) As per the case studies on the Senceive website, <https://www.senceive.com/case-studies> , the equipment is not for use by the general public
- 4) The equipment has to be carefully positioned so that it can correctly monitor the structure it is designed to monitor. Poor or incorrect installation would mean that the required monitoring would not occur.

iv) Other professional installation requirements.

- (1) Installation is controlled for reasons explained above.
- (2) The equipment is only sold by Senceive or selected specialist resellers
- (3) Correct use of the equipment requires training.
