Dear Sir,

We, the undersigned, would like to apply FCC Permissive Class II change for our original FCC ID: M4Y-06260. The only modification of the device is changing the antenna type.

The antennas are identical, except for the deletion of the cable.

The original antenna is a Dipole antenna with 1.5m length cable, and the purpose is for user to select for using, and the new one is a Dipole antenna which connect to EUT directly.

The new antenna is affixed to the EUT using a unique connector, which allows for replacement of a broken antenna, but DOES NOT use a standard antenna jack.

The whole structure, main PCB and all components are perfectly identical.

The EUT with new antenna has been tested and meet the requirement of FCC part 15.
The antenna photo is saved as attaché file "Antenna.pdf"

Please review our application.

If you have any further questions, please contact us. Thanks for your help.

Best Regards,

Z-Com, Inc.
