## Backrest Scanning Instructions

A body scan is performed every time the power is on and the user selects an Auto Mode, it is designed to ensure an accurate and personalized massage for every individual. After the power is on, sit on the chair slowly with your back against the chair back, your head against the pillow so the massage sensors can detect your Shoulder Height and the whole back position.

The Tablet Control gives beep sounds when completing a body scan. When micro-adjustment is needed, just touch Roller up/down   , then  to start massage. Make sure the body scan is finished correctly for the best massage.

Once body scan is completed, it will skip to the massage status page without further actions.

**Note:**

Heating, foot rollers can be turned on/off manually during any auto mode, see below.
