

Operational Description

The device is Home Plug + Wireless 11g Access Point that is like 2 devices in one box! The Home-Plug Wireless AP functions lets user to securely expand the range of the local area network, while Home-Plug utilizes the electric cord as the transfer media, the 11G utilizes the electric wave.

The function of Home Plug offers a convenient way to create a simple network through the existing power line of a home or office with the additional ability to provide you with access to your network without wires.

The function of Wireless 11g Access Point has the latest IEEE802.11g spec, which operates in the 2.4GHz frequency spectrum with throughput of up to 54Mbps which OFDM technique will be applied. If the signal to noise ratio is too poor which could not support 54Mbps, the 11Mbps data rate with CCK technique will applied.

The other instruction, please have a look at the users manual.
