- Please read this product manual and precautions before using this product.
- When using this product, please follow the following specifications:
 - 1) Please do not use this product in complex and harsh environments (such as surrounding high-voltage power grids, strong magnetic fields or large mechanical equipment, etc.), So as not to affect product performance and service life.
 - 2) Please do not put this product in the fire to bake or burn, so as to avoid danger and environmental pollution.
 - 3) Please do not wipe with corrosive liquids to avoid hard objects scratching the surface of the case and affecting the appearance.
 - 4) Do not place this product in the following environments: places that are too hot, cold or too humid, places that are exposed to direct sunlight, and places that are too dusty.
 - 5) When the surface of the case is stained with dirt and dust, wipe it with a dry muslin. Do not use cleaning fluids and other chemical solvents to avoid corrosion of the surface of the case and damage to the components in the machine.
 - 6) Unplug the USB cable and remove the battery when not in use for a long time.
 - 7) Do not try to disassemble, disassemble or modify any part of this product by yourself.
Such behavior may damage the product and invalidate your product warranty.
 - 8) If you want to discard this product, please put it in a professional recycling station for disposal.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
