

Radiated Emissions: 30 MHz to 18 GHz, Front

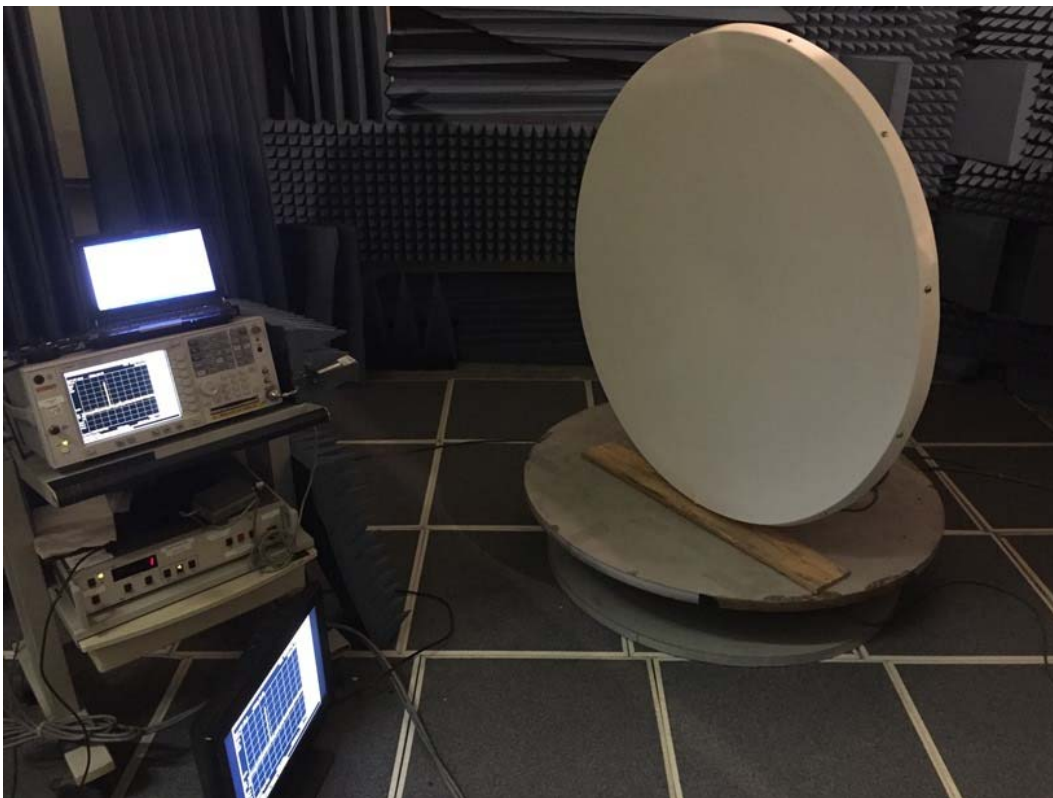

Note that the antenna is added for 18 GHz and above where the waveguide becomes effective.

Radiated Emissions: 30 MHz to 18 GHz, Back

Radiated Emissions: EUT Detail

Radiated Emissions: 18 to 26.5 GHz, Front

Radiated Emissions: 26.5 to 100 GHz, Front

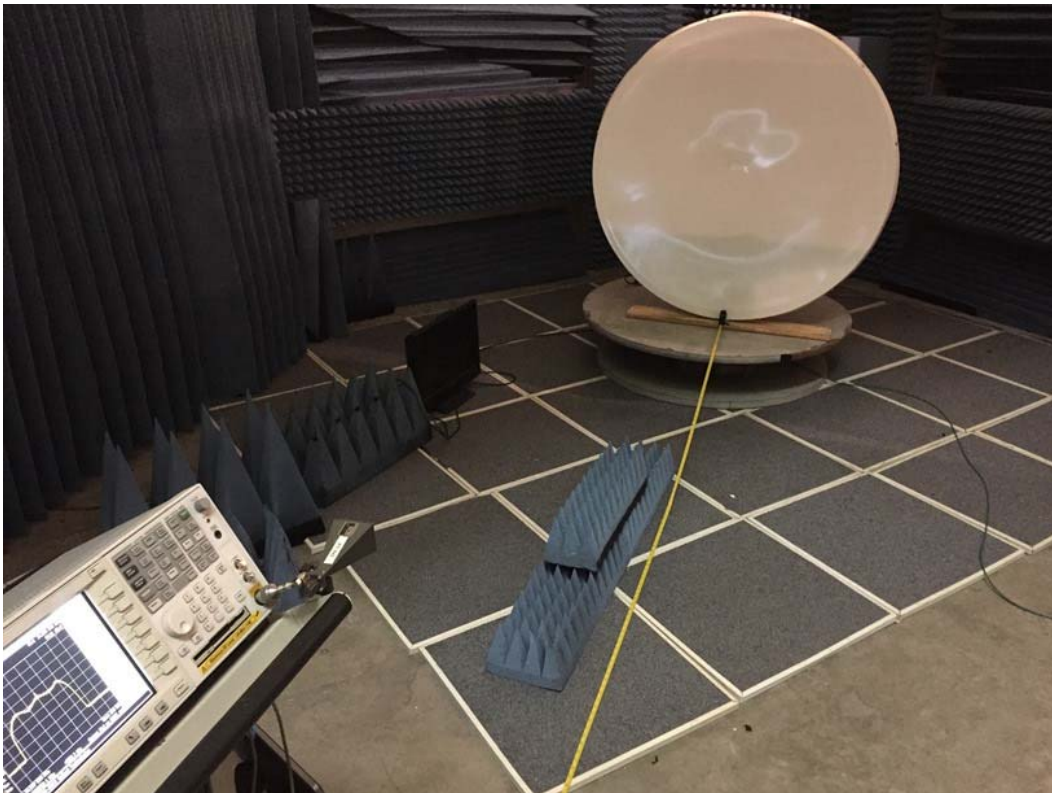

Frequency Stability: EUT and Test Equipment

Frequency Stability: EUT to Horn RF Capture

Frequency Stability: Equipment

Radiated Emissions: Part 101.111
