

Brand Name: tp-link Model Name: KC100

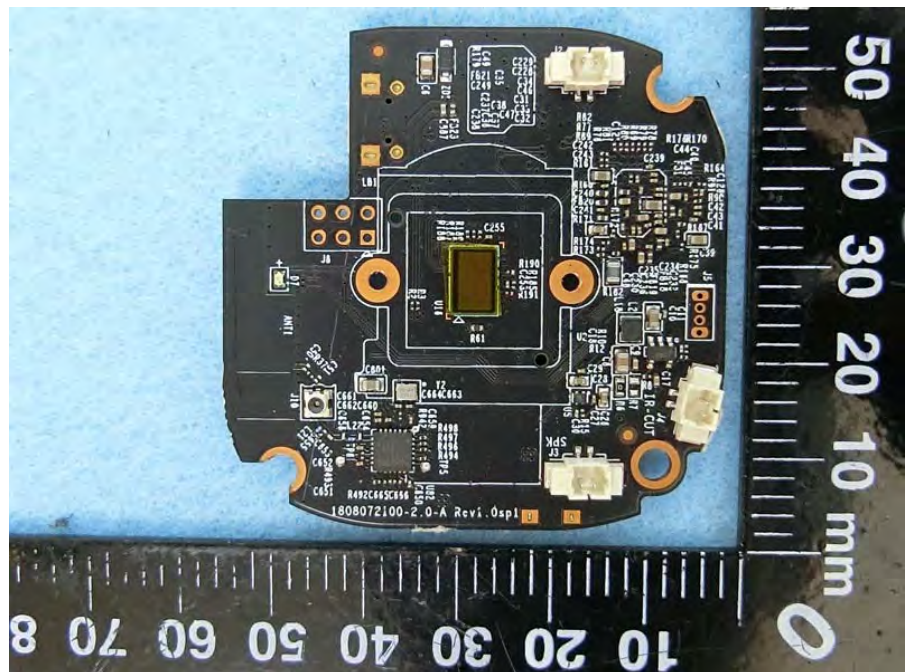

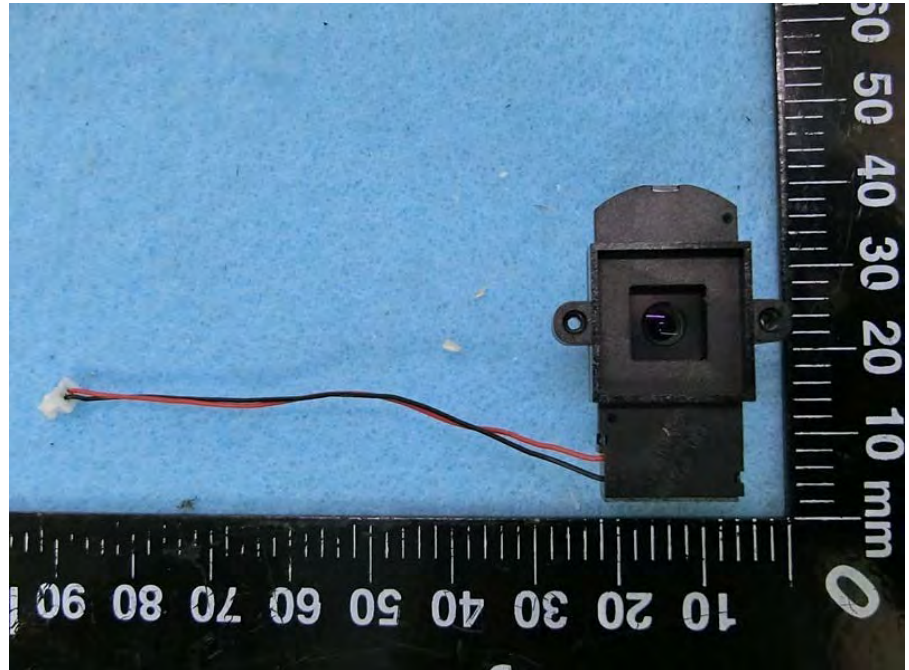

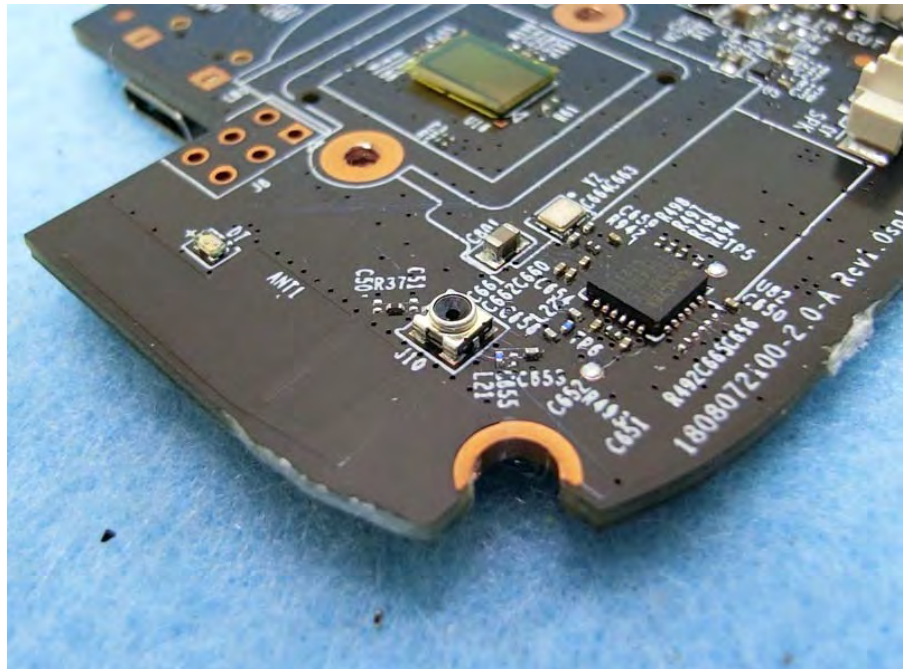

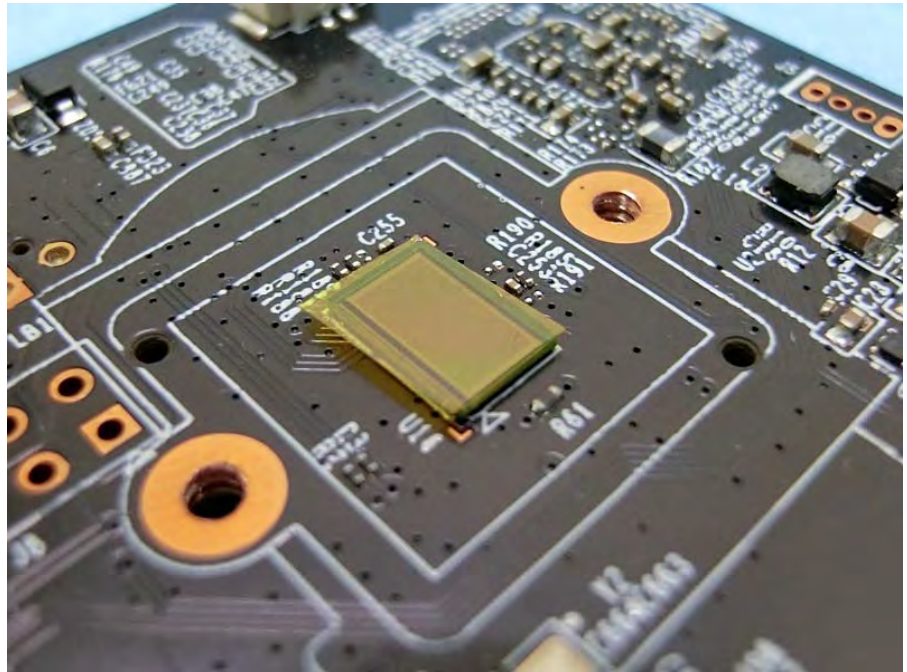

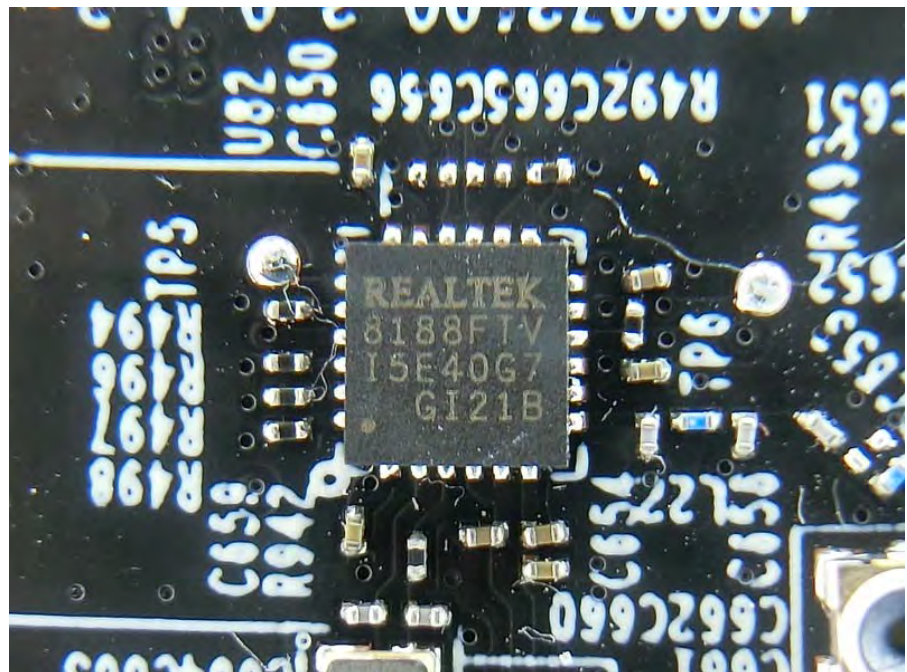

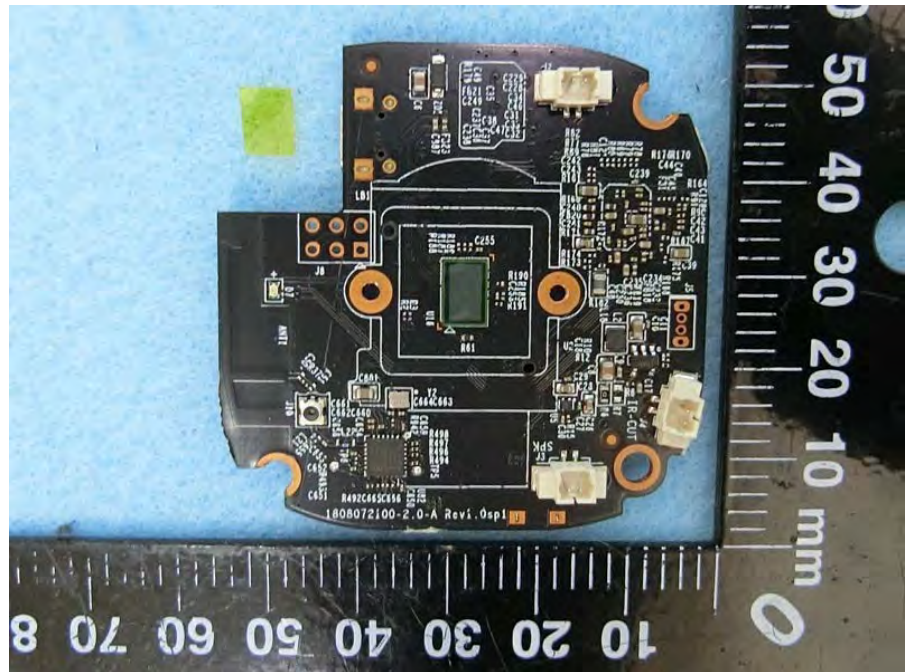

A close-up photograph of a printed circuit board (PCB) with a black solder mask. The board features several components and white silkscreen markings. A central component is a square, gold-colored package labeled "T400" and "MQNS". To its right is a rectangular component labeled "C801". Various other markings are visible, including "R497", "R498", "222", "562C660", "661", "Y2", and "C664C663". The board has a complex pattern of white conductive traces and circular vias.
