

## To start

Thank you for purchasing the EtherNet Board. This manual explains how to set up the EtherNet Board and connect it to the computer. Please use in conjunction with the User Manual.

Voluntary control on interference to radio communications

*This equipment is a Class A information technology equipment, which complies with the standards of VCCI. Interference to radio communications may occur if this equipment is used in a residential environment. If this is the case, the user is encouraged to use the appropriate measures [to correct the interference].*

## FCC STATEMENT

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and the receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/television technician for help.
