Re: Compliance to Section 15.203, EA94181 Corr. Ref. Number 8361

1. On the PC Card there will be a special connector, for connection to external antennae, that is the same as approved in all previous WaveLAN products (IMRWLPC24, IMRWPLC24H). For this product E (for Extended size of the card) and H (for High Speed with special modulation) have been added.

Unique connector is supplied by e.g. Radiall. For WaveLAN equipment "outside overall diameter remains unchanged on PCB receptacle and increases slightly on cable connector". Per fax dated 07-25-96 Gregory Czumak of FCC stated that this connector would comply with 15.203.

2. For use with outdoor antennae:
 - each outdoor antenna uses a standard N-type connector
 - user will receive an adapter cable assembly to change from special connector to N-type connector in total cabling system
 - with each outdoor antenna kit a manual/flyer will be shipped.

This manual/flyer will contain the following warning:

"The WaveLAN antenna shall be installed ONLY by experienced antenna installers who are familiar with local building and safety codes, and wherever necessary have been licensed by appropriate government regulatory bodies.

Failure to do so may void the Product Warranty, as well as expose the end-user to legal and/or financial liabilities.

Lucent, its agents, resellers or distributors, are not liable for injury, damage, or violation of government regulations that may arise from failing to comply with the guidelines described in this document."

In the manual that comes with each PC Card there will be a general warning on external antennae:

"The WaveLAN PC Card may only be connected to WaveLAN certified Lucent Technologies antennae. Using other antennae will void warranty and may cause degradation of system performance.

Outdoor antennae must be professionally installed complying with the certified antennae and cable kits. The use of unauthorized antennae violates the country's law or regulations

Lucent, its agents, resellers or distributors, are not liable for injury, damage, or violation of government regulations that may arise from failing to comply with the guidelines described in this document."
