

VB605 VIDEO BABY MONITOR

USER MANUAL

Ver 1.0

WELCOME...

to your new digital Baby Monitor!

Thank you for purchasing the product. Now you can see and hear your baby sleeping in the other room or you can monitor your older children in their playroom.

This User's Guide provides you with all the information you need to get the most from your product. Before you can use the baby monitor, we recommend you insert and fully charge the battery in the parent unit, so that it continues to work if you disconnect it from the mains power to carry it to another location. Please read the Safety Instructions on page 6 before you install the units.

1. Safety Instructions

- WARNING**
- This baby monitor is compliant with all relevant standards regarding electromagnetic fields and is, when handled as described in the User's Guide, safe to use. Therefore, always read the instructions in this User's Guide carefully before using the device.
- Adult assembly is required. Keep small parts away from children when assembling.
 - This product is not a toy. Do not allow children to play with it.
 - This baby monitor is not a substitute for responsible adult supervision.
 - Do not place the baby unit or cables in the cot or within arm's reach of the baby (at least 1 meter away).
 - Keep the cords out of reach of children.
 - Do not use the baby monitor near water or a heat source
 - Only use the power adapters provided.
 - Do not touch the plug contacts with sharp or metal objects.

2. Getting started

2.1 Baby unit power supply

- 1. Connect the small plug of the power adapter to the baby unit and the other end to the mains socket. **NOTE: Only use the power adapter provided**
- 2. A blue light led will display indicate the baby unit is working

2.2 Parent unit power supply

- Charging the parent unit fully before use is recommended.**
- This will allow the unit to operate on battery in the event of a power failure.
- 1. Connect the plug of the power adapter to the parent unit and the other end to the mains socket **NOTE: Only use the power adapter provided**
 - 2. The LCD will illuminates and starts up automatically after a few seconds, and shows a charging icon, means start charging the battery
 - 3. Press and hold the power key at least 3 seconds to turn on the parent unit.

3. Using the Baby Monitor

3.1 Setting up

Place the baby unit in a convenient location (e.g. on a table) and point the camera lens towards the area you want to monitor. Adjust the baby unit until you are satisfied with the image in the parent unit.

NOTE

Do not place the baby unit within baby's reach! If there is interference on the picture or sound, try moving the units to different locations, and ensure they are not close to other electrical equipment.

This product cannot be carried with you when you use it, it must be used in a fixed position.

9

3.2 Pairing camera

The enclosed baby unit has already been registered , You do not need to register it again unless the baby unit loses its link with the parent unit. See section "5.2 Camera Registration" for more details.

FCC Warning

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Radiation Exposure Statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
