

VX3 HD Video Outdoor Camera
Installation Guide

Online Guides
www.resideo.com

Setup and operation require a Total Connect® 2.0 account and the Total Connect 2.0 mobile app. We recommend performing Total Connect setup **before** physical installation in hard-to-reach locations.

- Read these instructions carefully; failure to follow the instructions can damage the product or cause a hazardous condition.
- Check the product information to see if the product is suitable for your application.
- After completing installation, use these instructions to verify the product's operation.

TC2 Account & Password

- Download and install the Total Connect 2.0 app.
- The location owner's Wi-Fi password may be needed.

Connectivity

The camera supports Wi-Fi and ethernet connectivity simultaneously.

Use the app for step-by-step install and setup instructions.

- From the Camera screen, tap the Add Camera button
- Select the correct device
- Follow the in-app instructions.

Or continue steps 1 to 4 below...

Troubleshooting

Removing the Camera

To uninstall or adjust wiring, use the Release Tool (provided) in the pinhole at the side of the mounting bracket.*

Accessing the Reset Button

The reset button is located on the bottom of the device.*

Camera does not Power On

If the light does not come on, check that the power is on and the correct cables are connected.

Forced Reboot

To force reboot for any reason, press the reset button for 5 seconds.*

Factory Reset

To factory reset for any reason, press the reset button for 25 seconds.*

Camera not in Pairing Mode

If the blue light does not illuminate, press the reset button for 10 seconds to initiate pairing mode.

Adjusting Camera and Event Sensitivity

Use Total Connect 2.0 app to adjust sensitivity under the doorbell camera settings.

*If you're still experiencing issues, follow the setup instructions in the app.

Lighting Functions				
Light On Device	Light Color	Light Behavior	Device Status	Note/Resolution
	Installation			
	White	Slow Pulse	Waiting for Bluetooth Pairing	BLE Pairing Will Begin Automatically
	Blue	Slow Pulse	Bluetooth Pairing	
	Blue	Solid	Wi-Fi Pairing and Registration	
	Red	2 Rapid Pulse	Error/Setup Fail	Follow In-App Troubleshooting
	Green	2 Rapid Pulse	Success/Confirmation	
	No Light		No Power	Check Wiring Connections
	In Use			
	White	Solid/Dim	Idle Night/Dark Conditions	
	White	Brightness Increase	Person Sensed	
	White	Pulsing	Firmware Update	Wait for Update to Complete
	Green	Solid	Two Way Communication	
	Yellow	Solid 5 Sec	Forced Reboot(Reset Button Pressed)	
	Red	Solid 5 Sec to Cycle	Factory Reset(Reset Button Held)	
	No Light		Idle Day/Bright Conditions	
	White	Solid	Person Sensed	Colored Night/Vision Mode On
	White	Rapid Pulsing	Tamper Alarm or Alarm Triggered	Reconnect Device or Disable Alarm

Camera Specifications

Outdoor Camera

Part Number.....CAMWE-WO
Operating Temperature.....-40°F to 122°F (-40 °C to 50 °C)
Operating Humidity.....10 to 85% Non-condensing
Shipping Temperature.....-4°F to 158°F (-20 °C to 70 °C)
Shipping Humidity.....10 to 95% Non-condensing
Physical Dimensions.....3 x 3 x 5in (76.2 x 76.2 x 127.0mm)
Color.....White
Power Input.....12VDC or 802.3af PoE Class 3 PD
Weatherproofing.....IP66

1 Mounting Plate Installation

- Drill Hole Through Mounting Surface**
Skip this step if you are not routing cables through the mounting surface. The recommended drill bit size is 7/8in (22.2mm) or larger.
- Align and Install the Mounting Bracket**
If routing cables through the mounting surface, align the mounting bracket's center opening with the hole you drilled.

Screw the mounting bracket to the surface with the screws provided. If necessary, use the included wall anchors.

3 Outdoor Camera Installation

- Route Cable Through Drilled Hole**
Route the cable through the hole drilled previously. Make sure the cable doesn't retract.

- Connect Cable to Device**
Connect the cable to the matching connector on the back of the camera.

For Standard Power
Apply the weatherproofing seal around the barrel jack connectors. If not using standard power, use the plug on the weatherproofing seal to protect the unused connector.

For PoE
Apply the weatherproofing kit around the ethernet connection. If not using POE, the weatherproofing kit is not required around the ethernet connector.

- Attach Camera to the Mounting Bracket**
Align and snap the camera to the mounting bracket while routing the cable bundle through the drilled hole.

- Position Camera**
Position the camera to point at the desired area. Tighten the locking collar to lock the camera into place.

- Set Screw**
Using the provided hex wrench, tighten the set screw on the collar to permanently secure the camera's position.

4 Connecting to App

- Connect the power supply. (If using PoE, apply power to the PoE injector or network switch.)
- When the power is on, wait for the Halo LED to flash blue. This indicates BLE pairing mode.
- Follow instructions in app to complete setup.

Back Box Accessory

Conduit Support
Supports three 1/2in (7.3mm) conduit.

Cable Management
Allows for out-of-wall cabling and connections.

Weatherproofing
IP66 rated to ensure cable protection.

Stand-Off
Increase camera height in difficult installation scenarios.

Easy Installation
Replaces standard mounting bracket while retaining ease of installation with minimum number of screws.

FEDERAL COMMUNICATIONS COMMISSION & ISED STATEMENTS

The user shall not make any changes or modifications to the equipment unless authorized by the Installation Instructions or User's Manual. Unauthorized changes or modifications could void the user's authority to operate the equipment.

CLASS B DIGITAL DEVICE STATEMENT

This equipment has been tested to FCC requirements and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- If using an indoor antenna, have a quality outdoor antenna installed.
- Reorient or relocate the receiving antenna.
- Move the radio or television receiver away from the receiver/control.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC / ISED STATEMENT

This device complies with Part 15 of the FCC Rules, and ISED's license-exempt RSSs. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation.

Cet appareil est conforme à la partie 15 des règles de la FCC et exempt de licence RSS d'ISED. Son fonctionnement est soumis aux conditions suivantes: (1) Cet appareil ne doit pas causer d'interférences nuisibles. (2) Cet appareil doit accepter toute interférence reçue y compris les interférences causant une réception indésirable.

RF EXPOSURE STATEMENT:

The antenna(s) used for this device must be installed to provide a separation distance of at least 7.8 inches (20 cm) from all persons and must not be co-located or operating in conjunction with any other antenna or transmitter except in accordance with FCC and ISED multi-transmitter product procedures.

MISE EN GARDE EXPOSITION AUX FRÉQUENCES RADIO:

La/les antenne(s) utilisée(s) pour cet émetteur doit/doivent être installée(s) à une distance de séparation d'au moins 20 cm (7,8 pouces) de toute personne et ne pas être située(s) ni fonctionner parallèlement à tout autre transmetteur ou antenne, excepté en conformité avec les procédures de produit multi transmetteur FCC et ISED.

This equipment should be installed in accordance with National Electrical Code, NFPA 70, Standard for the Installation of Residential Fire Warning Systems, CAN/ULC-S540 and Chapter 2 of the National Fire Alarm Code, ANSI/NFPA 72 (National Fire Protection Association, Batterymarch Park, Quincy, MA 02269). Printed information describing proper installation, operation, testing, maintenance, evacuation planning, and repair service is to be provided with this equipment.

Canadian Installations
For Installation in Canada, wiring shall be in accordance with CSA C22.1, Canadian Electrical Code, Part I, Safety Standard for Electrical Installations; CAN/ULC S302, Standard for the Installation, Inspection and Testing of Intrusion Alarm Systems; and CAN/ULC S301, Standard for Ignal Receiving Centre Intrusion Alarm Systems and Operations.

Any attempt to reverse-engineer this device by decoding proprietary protocols, de-compiling firmware, or any similar actions is strictly prohibited. The product should not be disposed of with other household waste. Check for the nearest authorized collection centers or authorized recyclers. The correct disposal of end-of-life equipment will help prevent potential negative consequences for the environment and human health.
