Solder Board-Component View 3	 A photograph of a small, rectangular electronic component, likely a solder board, placed on a blue background. The component is positioned horizontally and is partially covered by a black ruler with white markings. The ruler shows measurements in millimeters (0 to 100) and centimeters (0 to 10). The component has a gold-colored connector on the left side and a series of small, dark components (possibly LEDs or resistors) along its length. The text "SOLDER BOARD" is visible on the component.
Solder Board-Component View 4	 A photograph of the same electronic component from a different angle, showing the underside. The component is placed on a blue background and is partially covered by a black ruler with white markings. The ruler shows measurements in millimeters (0 to 100) and centimeters (0 to 10). The component has a series of small, dark components (possibly LEDs or resistors) along its length. The text "F1-LED-V1.0F" is visible on the component.

Model: SOLO

EUT Housing and Board View 1	 A photograph showing the EUT housing and board from a top-down perspective. The components are laid out on a blue surface next to a ruler. The ruler is oriented vertically on the left and horizontally at the bottom. The components include a black plastic housing with the 'audfly' logo, a circuit board with various electronic components, a small metal component, and a black plastic bracket. The circuit board is connected to the housing by several wires.
EUT Housing and Board View 2	 A photograph showing the EUT housing and board from a different perspective. The components are laid out on a blue surface next to a ruler. The ruler is oriented vertically on the left and horizontally at the bottom. The components include a black plastic housing with the 'audfly' logo, a circuit board with various electronic components, a small metal component, and a black plastic bracket. The circuit board is connected to the housing by several wires.

Solder Board-Component View 1	 A photograph of a small, rectangular electronic component, likely a solder board, placed on a blue surface. The component is positioned horizontally and is flanked by two black rulers for scale. The ruler on the left shows measurements in millimeters (0 to 100 mm), and the ruler on the right shows measurements in centimeters (0 to 10 cm). The component itself has a black surface with various electronic components, including a small white component on the right side. The text "F1-LED-V1.0F" is visible on the component.

Solder Board-Component View 3	 A photograph of a small, rectangular, black solder board component. The component has a gold-colored connector on one end and two small circular holes. It is placed on a blue surface next to a black ruler with white markings. The ruler shows measurements in millimeters (0 to 100) and centimeters (0 to 10).
Solder Board-Component View 4	 A photograph of the same solder board component from a different angle. This view shows the underside of the component, revealing various electronic components like resistors and capacitors. It is placed on a blue surface next to a black ruler with white markings. The ruler shows measurements in millimeters (0 to 100) and centimeters (0 to 10).

Solder Board-Component View 5	 A photograph of a small electronic component, likely a solder joint, mounted on a blue surface. The component is a small green PCB with a white cylindrical component attached. It is positioned next to a black L-shaped ruler with white markings in millimeters. The ruler shows dimensions from 0 to 100 mm on both the horizontal and vertical axes.
Solder Board-Component View 6	 A photograph of the same electronic component from a different angle. The component is a small green PCB with a white cylindrical component attached. It is positioned next to a black L-shaped ruler with white markings in millimeters. The ruler shows dimensions from 0 to 100 mm on both the horizontal and vertical axes.
