Columbia, Maryland, 21046

Dear Sir/Madam,

This application is for a DTS: 802.11b which with the 802.11a (UNII) consists a combo module composite device. However, I made a mistake in the equipment specifications of form 731. Could you please replace all the specifications there with the following one?

Frequency range: 2412MHz - 2483.5MHz  
Rated RF power output in watts: 46.8  
Emission Designator: 18M6G1D  
Microprocessor model number: AR5211

Please let me know, if you have any questions. Thank you very much for your help!

Best Regards,

Jennifer Song
