Step 6: Adding your Cameras

This hub is compatible with multiple Night Owl Wi-Fi devices. When you choose to add a new camera, the app will ask you what type and walk you through the setup steps. Ensure you test the connection and functionality of each camera you connect before you mount them. Check for signal strength in the desired placement location and adjust the placement if needed.

However, you can also scan the QR code below for more in-depth step-by-step instructions.

14

TV or Monitor Viewing (Optional) To view and access your hub from a TV or monitor, simply connect an HDMI cable (not included) from the hub to your TV or monitor. You can use the app to adjust the layout.

Transfer Recordings to a USB Drive

15

You can easily transfer your recordings to a USB drive for long-term storage or sharing. To do this: Insert a USB flash drive into the USB port on the rear of the hub.
 Go to the hub settings within the app to transfer the selected recordings. IMPORTANT: Hub supports up to USB 2.0 with FAT32 file system.

 Place the hub in a central location within range of where your cameras will be an under the second second second second based of the second second second second objector cause the hub near large metal objector sources that many interfere with the signal (such as a microwave).

Pre-Setup Checklist

Placement Tips

hub to ensure you do not face any signil issue. 1. Central location: Place the hub in a signal distribution. 2. Bevaled Position: An elevated position, any signal distribution. 3. Bevaled Position: An elevated position, any and interference: Reep the hub away from devices that can case interference, such metal objects. 3. Provinny to Connected Devices: Fung- thether and objects and the service of the service of the metal objects. 3. Provinny to Connected Devices: Fung- thether the service of the service of the service of the needs to connect to, explorable varies of the minimize the number of these varies between the hub and connected devices. A valid Sarrens: Reeg the hub away from humidity to protect its hardware.

Refer to the following tips when placing your new hub to ensure you do not face any signal issues.

Step 1: Power on the Hub

•

Step 2: Ethernet Cable

Using the provided 6 ft. Ethernet cable, connect one end to the hub and the other end to your router. IMPORTANT: The hub MUST be connected to your router via Ethernet cable for initial setup. Once completed, you can remove the cable for a wireless connection

Google Play

Step 3: Download the Night Owl App

App Store

Already have an account? Simply log in.

If you are a first-time user, go ahead and download the Night Owl app. Quickly create an account and log in.

The app will then walk you through the remaining steps needed to connect your hub.

Step 4: Scan the QR Code

During setup, you may be prompted to update the hub's firmware. Firmware updates maintain the overall health of your device. While logged into the app, use your smart device's camera to scan the QR code on the hub. IMPORTANT: DO NOT power off the hub while the firmware is being updated

Step 5: Firmware Update
