FCC ID: CJ6DCE46036A

Gentlemen:

I hereby certify that the Transceiver FCC ID: CJ6DCE46036A is so designed that it complies with all the requirements for ESN protection specified in Section 22.919.

- (a) The transmitter in service has a unique ESN.
- (b) The ESN host component is permanently attached to a Logic board of the Handheld portable the integrity of the unit's operating software can not be alterable. The ESN is isolated from fraudulent contact and tampering. The ESN is encoded using multiplication by a polynomial and the ESN data programmed in the memory with other information.
- (c) The ESN is factory set and can not be alterable, transferable, removable or otherwise able to be manipulated. Cellular mobile equipment is specifically designed such that any attempt to remove, tamper with, or change the ESN chip, its logic system, or firmware originally programmed by the manufacture will render the mobile transmitter inoperative.

The detail documents of ESN are shown in Exhibit Type "Operational Description".

Yours faithfully,

FCC E911 Requirements Per S22.921

Gentlemen:

I hereby certify that the Transceiver FCC ID: CJ6DCE46036A, using the automatic A/B Roaming – Intelligent Retry method, meets the E911 requirements specified in Section 22.921 of the FCC Rules. This procedure recognizes when a “9-1-1” call is made and, at such time, will override any programming in the mobile unit that determines the handling of a non-911 call and permit the call to be handled by other analog carriers.

Should you have any questions or comments concerning the above, please contact the undersigned.
