

Regulations information

FCC Regulations:

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This device has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation if this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

RF Exposure Information

According to the definition of mobile and fixed device is described in Part 2.1091(b), this device is a mobile device.

This device complies with FCC radio exposure limits set forth for an uncontrolled environment. In order to avoid the possibility of exceeding the FCC radio frequency exposure limits, human proximity to the antenna shall not be less than 20 cm (8 inches) during normal operation.

This Modular Approval is limited to OEM installation for mobile and fixed applications only.

This module must not be collocated or operating in conjunction with any other antenna or transmitter, except in accordance with FCC multi-transmitter evaluation procedures as documented in this filing.

The host end product must include a user manual that clearly defines operating requirements and conditions that must be observed to ensure compliance with current FCC RF exposure guidelines.

A separate approval is required for all other operating configurations, including portable configurations with respect to 2.1093 and different antenna configurations.

Host Labeling and Manual

The host end product must include a user manual that clearly defines operating requirements and conditions that must be observed to ensure compliance with current FCC RF exposure guidelines.

The host end product has the option to use a permanently affixed label, or an electronic label. For a permanently affixed label, the hosts must be labeled with "Contains: FCC ID: VDEAPCBPGN2101". The host OEM user manual must also contain clear instructions on how end users can find and/or access the module and the FCC ID if an electronic labelling is used.

The final host / module combination may also need to be evaluated against the FCC Part 15B criteria for unintentional radiators in order to be properly authorized for operation as a Part 15 digital device.

ISED Notice

This device complies with Innovation, Science and Economic Development Canada license-exempt RSS standard(s). Operation is subject to the following two conditions:

- (1) This device may not cause interference, and
- (2) This device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR Innovation, Sciences et Développement économique Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes:

- (1) l'appareil ne doit pas produire de brouillage, et
- (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en.

This digital apparatus complies with Canadian ICES-003.

Cet appareil numérique est conforme à la norme NMB-003 du Canada.

ISED Radiation Exposure Statement

According to the definition of mobile and fixed device is described in RSS-102, this device is a mobile device.

Selon la définition de dispositif mobile et fixe est décrite dans RSS-102, cet appareil est un appareil mobile.

This device complies with RSS-102 radio exposure limits set forth for an uncontrolled environment. In order to avoid the possibility of exceeding the RSS-102 radio frequency exposure limits, human proximity to the antenna shall not be less than 20 cm (8 inches) during normal operation.

Cet appareil est conforme aux limites d'exposition aux rayonnements de la CNR-102 définies pour un environnement non contrôlé. Afin d'éviter la possibilité de dépasser les limites d'exposition aux fréquences radio de la CNR-102, la proximité humaine à l'antenne ne doit pas être inférieure à 20 cm (8 pouces) pendant le fonctionnement normal.

This Modular Approval is limited to OEM installation for mobile and fixed applications only.

Cette approbation modulaire est limitée à l'installation OEM pour les applications mobiles et fixes uniquement.

This module must not be collocated or operating in conjunction with any other antenna or transmitter, except in accordance with multi-transmitter evaluation procedures as documented in this filing.

Ce module ne doit pas être colocalisé ou exploité conjointement avec une autre antenne ou un autre émetteur, sauf en conformité avec les procédures d'évaluation multi-émetteurs documentées dans le présent dépôt.

The host end product must include a user manual that clearly defines operating requirements and conditions that must be observed to ensure compliance with current RSS-102 RF exposure guidelines.

Le produit final hôte doit comprendre un manuel de l'utilisateur qui définit clairement les exigences d'exploitation et les conditions qui doivent être respectées pour assurer la conformité aux lignes directrices actuelles sur l'exposition aux RF du CNR-102.

A separate approval is required for all other operating configurations, including portable configurations with respect to RSS-102 and different antenna configurations.

Une approbation distincte est requise pour toutes les autres configurations d'exploitation, y compris les configurations portatives en ce qui concerne le CNR-102 et les différentes configurations d'antennes.

Host Labeling and Manual

The host end product must include a user manual that clearly defines operating requirements and conditions that must be observed to ensure compliance with current RSS-102 RF exposure guidelines.

Le produit final hôte doit comprendre un manuel de l'utilisateur qui définit clairement les exigences d'exploitation et les conditions qui doivent être respectées pour assurer la conformité aux lignes directrices actuelles sur l'exposition aux RF du CNR-102.

The host end product has the option to use a permanently affixed label, or an electronic label. For a permanently affixed label, the hosts must be labeled with "Contains: IC: 8036A-APCBPGN2101". The host OEM user manual must also contain clear instructions on how end users can find and/or access the module and the IC number if an electronic labelling is used.

Le produit final hôte a la possibilité d'utiliser une étiquette apposée de façon permanente ou une étiquette électronique. Pour une étiquette apposée de façon permanente, les hôtes doivent être étiquetés avec « Contient : IC : 8036A-APCBPGN2101 ». Le manuel d'utilisation de l'OEM hôte doit également contenir des instructions claires sur la façon dont les utilisateurs finaux peuvent trouver et / ou accéder au module et au numéro IC si un étiquetage électronique est utilisé.

The final host / module combination may also need to be evaluated against the ICES-003 criteria for unintentional radiators in order to be properly authorized for operation as a digital device.

La combinaison finale hôte/module peut également devoir être évaluée par rapport aux critères de la NSI-003 pour les radiateurs non intentionnels afin d'être correctement autorisée à fonctionner en tant qu'appareil numérique.
