RE: FCC ID: PPIRM-167_ATCB003491
Attention: Jussi Visuri

I have a few comments on this Application. Please note that further comments may arise in response to answers provided to the questions below.

1. Please note that the SAR report data shows that three probes were used in testing (SN1786, 1808 and 1813). However, calibration data for only two probes (SN1813, 1808) appear to be provided in the report. Please provide the calibration data for probe SN1786.
2. Please note that three probes were used in SAR testing, however only two system check data tables have been provided. These are apparently for probe SN1808 and 1786. However, it is an assumption on probe 1786 as calibration data has not been provided. Please provide the third system check using the third probe and please clearly identify which probe was used in each system check table.
