

To Whom It May Concern:

Subject: Validity of Test Results from Testing / Certification of the integrated Module

WE, HAP Innovations, LLC, 4220 Apex Highway, Suite 200 Durham, NC 27713

Confirm that the results from conducted tests applied to the radio modules:

- Gemalto Cinterion ELS31-V, FCC ID: QIOELS31-V
- Texas Instruments WL1835MOD, FCC ID: Z64-WL18SBMOD

Which is incorporated in our host equipment Spencer sp.01, FCC ID: 2AIA7-SPN01 and as reported in module test reports:

- EMC_CETEC_139_15001_FCC27_LTE_V1.0, 12-03-2016
- FR3N2752-01A, 01/27/2014
- FR3N2752-01B, 01/27/2014
- FR3N2752-01C, 01/27/2014

Accurately represent the test results under the new conditions when the identified radio module is integrated in the identified host equipment.

By integration of the said radio module into the identified host equipment no changes were made to it or by external adaptation circuitry that impacts the validity of the results of the original module's test reports (except for mode 802.11g which had higher power via software change on the module and for that reason the full testing was performed on this specific mode).
