

AUTO PRO BLUETOOTH ADAPTER USER GUIDE

Thank you for purchasing the AUTOTECH AT-BT BLUETOOTH RECEIVER,
PLEASE READ INSTRUCTION BEFORE USE.

CHARGING:

Using the cable provided charge your Bluetooth receiver to 100% (led light will turn off when fully charged)

Pairing:

- To enter pairing mode, press and hold the button for 2 seconds until the red and blue light flashes.
- On your phone or device settings select the Bluetooth receiver "AT-BT" to connect, if your connection is successful the led on the receiver will flash blue.
- Using the receiver with a wired 3.5mm headphone: plug wired headphone to the receiver as a dongle and pair the AT-BT receiver to your phone or other Bluetooth device. You can now listen to your wired headphone wireless.
- Using the receiver with an AUX INPUT.
- Make sure that the device you are plugging the Bluetooth receiver into is turned on and paired with the receiver. The blue led will flash to indicate successful pairing.

Note: if you cannot hear the music make sure your car or device is set to AUX or check that the volume is not turned down.

FCC Statement

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

RF Exposure Information

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
