Subject: FCC Class II Permissive Changes/IC Reassessment, Cover Letter

Dear Mr. Noble,

With reference to above, the Unisys Product Compliance Test Center (PCTC) would like to submit the following listed exhibits on behalf of the Schulmerich Carillons, Inc. The reason for this application is to report the details of the Class II permissive changes made in the Schulmerich Carillons Generation4 Outdoor Radio Remote Control (FCC certified equipment), and the results of tests performed to make sure that the modified equipment remains compliant with the applicable FCC requirements.

Similarly, this submission also serves the purpose of reassessment for continuous compliance with the applicable Industry Canada (IC) requirements.

List of Exhibits

1. Cover letter
2. Reason for Reassessment
3. ATCB- Form 731
4. ATCB – Form RSP100
5. EMI Test Report
6. Test Setup Photos (4 Photos)
7. Spectral Plots (2 Plots: Low and High Frequencies)
8. Internal Photos (2 Pictures: showing the changes to the certified equipment – RF Transmitter and short antenna feed line cable))
9. Block Diagram
10. Schematic (shows replacement of RF Transmitter and removal of 20.5-Ohm series resistor)

Since there is no change made to the external of the Generation4 Outdoor Radio Remote Control and its operating instructions, we do not see any need for submitting the external photos, FCC/IC label text/location picture and operating instructions.
