

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the disassembled components of an Electronic Under Test (EUT). On the left is the black plastic housing with a circular opening. In the center is a green printed circuit board (PCB) with various electronic components, including a red component and a black component. To the right is a black circular lid. A black cable is connected to the PCB. A black ruler with white markings is placed horizontally below the components, showing measurements in millimeters and centimeters.
Solder Board-Component View 1	 A photograph showing a close-up view of the solder board-component. It features a circular copper pad in the center, surrounded by a silver-colored metal ring. A black cable is connected to the component. A black ruler with white markings is placed horizontally below the component, showing measurements in millimeters and centimeters.

Solder Board-Component View 4	 A photograph showing the solder side of a component. The component is a light-colored, semi-circular PCB with two green solder points and a small black component. It is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component's width being approximately 40 mm.
Antenna View	 A photograph showing the antenna side of the component. The component is a circular, silver-colored metal housing with a central copper-colored circular antenna. A red box highlights the antenna, and a red line points to it from a label "Wireless Charger Antenna". The component is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component's diameter being approximately 40 mm.
