Need help?

If you have any problems setting up or using your wireless car adapter, please contact us by visiting:

motorolasound.com/support

This user guide provides you with all the information you need to get the most from your wireless car adapter.

Read the instructions carefully, and be informed that this wireless car adapter is only intended to work inside your Android™ Auto compatible car together with your smartphone which has the Android Auto app installed.

1. Getting to know your adapter

1	USB standard Type-A connector to plug into your car's Android Auto-enabled USB port
2	Adapter button for Bluetooth pairing and reset
3	LED <ul style="list-style-type: none">• White = adapter powering on• Blue = Bluetooth pairing mode• Green = connecting Android Auto

2. Place the adapter inside your car

You can find a Jel Pad inside the pack. This can be used to fix the adapter inside your car.

- Remove the release liner on any one side of the jel pad.
- Place the jel pad inside your car, where it is close to the USB port of your car.
- Remove the release liner at the other side of the jel pad.
- Place your adapter on the jel pad.

3. Setting up your adapter

Before setting up your adapter, connect your phone to Android Auto using a wired USB connection following your vehicle manufacturer's instructions.

While the Android Auto connection is active on your car screen, unplug your phone from the car and immediately plug your adapter into the same USB port.

To use Android Auto wirelessly, your phone should be running version 11 or higher of the Android operating system.

4. Pair with the wireless car adapter

When the adapter LED flashes blue, pair your phone with it (look for 'AndroidAuto-XXXX' under Settings > Bluetooth on your phone).

Now, wait for your phone to automatically re-establish its Android Auto connection wirelessly through the adapter; this may take a while.

On subsequent drives, Android Auto will start wirelessly after the car connects to your phone for hands-free calling (HFP) from the car's Bluetooth menu.

5. Factory reset

While powered on, press and hold the adapter button. To pair a new phone, release the button when it begins blinking blue. The adapter is now ready to accept a new Bluetooth pairing request from a nearby phone.

To erase adapter memory, do not release the button when it starts blinking blue; instead, continue holding it down until it blinks yellow, and release only when it turns white; remembered phones are now cleared.

6. Technical Specifications

Wireless	- Wi-Fi® 802.11 a/n/ac - Bluetooth 5.0
Connection	USB A type Client

7. General Information

Cleaning

- Clean the adapter with a damp (not wet) cloth, or an anti-static wipe.
- Never use household polish as this will damage the product. Never use a dry cloth as this may cause static shock.

Environment

- Do not expose to direct sunlight.
- Do not place your product on carpets or other surfaces which generate fibers, or place it in locations preventing the free flow of air over its surfaces.
- Do not submerge any part of your product in water and do not use it in damp or humid conditions, such as bathrooms.
- Do not expose your product to fire, explosives or other hazardous conditions.
