RE: FCC ID: AS5CMP-41
Applicant: Lucent Technologies
Corr. Ref. #:
731 Confirm. #: TC100040

Subject: Certification of a part 24(E) PCB.

In reference to a request for certification from Lucent Technologies, Elite performed a certification of the above referenced product manufactured by Lucent Technologies. Elite informed Lucent Technologies that the substitution method of TIA-603 should be used to test the radiated spurious emissions test. Since the commission has accepted the spurious radiated emissions test data produced by Lucent and Lucent was unaware of the requirement to test using the substitution method. Elite accepted the test data.
