## **1. OT208 / MYX-7A DIFFERENCES DESCRIPTION**

### **1.1 GENERALITY**

OT 208 is a derivative from MyX-7a (FCC ID: M9H95H03R3A).

Main hardware differences between OT208 and myX-7a are suppression of the camera and adding of a connector/switch antenna at the previous camera location. The shielding of the camera is kept in order to keep the radio frequency specifications.

### **1.2 PART LIST DIFFERENTIAL OT208/MYX-7A**

#### **Component removed:**

Camera

#### **Component added:**

Switchable connector

Body (design) is different
