

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	
EUT Housing and Board View 2	

Solder Board-Component View 1	 A photograph showing two circular components side-by-side on a blue textured surface. The component on the left is a green printed circuit board (PCB) populated with various electronic components, including a central microcontroller, resistors, and capacitors. It is mounted within a silver-colored metal ring. The component on the right is a plain, silver-colored metal ring. A black ruler with white markings is positioned vertically to the left of the components, showing measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm).
Solder Board-Component View 2	 A close-up photograph of the green PCB component from View 1, showing its internal circuitry. The PCB is populated with various components, including a central microcontroller, resistors, capacitors, and a small LED. It is mounted within a silver-colored metal ring. A black ruler with white markings is positioned vertically to the left of the component, showing measurements in millimeters (0 to 80 mm) and centimeters (0 to 10 cm).

Solder Board-Component View 3	 A photograph showing a circular green and gold solder board component and a silver metal component, both resting on a blue textured surface. A black ruler with white markings is placed horizontally below the components, showing measurements in millimeters. The ruler has markings from 0 to 100 mm on the top edge and 0 to 100 mm on the bottom edge.
Antenna View	Wireless Charging Antenna  A photograph showing a white circular device with its lid open, revealing a silver metal component inside. A red line points from the text 'Wireless Charging Antenna' to the silver component. A black ruler with white markings is placed horizontally below the device, showing measurements in millimeters. The ruler has markings from 0 to 100 mm on the top edge and 0 to 100 mm on the bottom edge.
